

Application for an Approach Permit Instruction Sheet

Fill out the white section of the Application Section of the Approach Permit.

Take the Completed Application to the Meade County Equalization & Planning Office. The Highway Superintendent will review the request for the approval of the Approach Location.

(This most likely will be a physical check of the proposed approach location and may take a few days).

When the Location is approved, the \$85.00 fee must be paid.

(A check may be left at the time the Application is turned in; it will not be deposited until the proposed Approach location is approved).

If approved, you may construct the Approach.

After the Approach is constructed, call Meade County Equalization & Planning for an Inspection.

If Approved, the Permit will be issued.

Note: You must have an Approved Permit for each and every new Approach Constructed in Meade County.
