# BUYERS GALLERY

Interior Design Today presents the Buyers Gallery, a selection of products and services that will help you create the perfect look in your next project - whether it's a nightclub in New York, an apartment in Mayfair or an innovative office redesign. This issue we look at the extensive portfolio from Polyflor; climate control solutions for clients in private and commercial spaces; acoustics in the work place from Wobedo; limited edition artwork to adorn walls by Signature; metalised wallpaper from Metall FX and bespoke furniture designers to name just a few IDEAS.

▲ Quality design, improved maintenance, ease of use and genuine product choice is available across Polyflor's vast range of homogeneous, heterogeneous, safety, acoustic, rubber and designer luxury vinyl tile products. Polyflor have an extensive portfolio of products to suit all project needs and offer the highest levels of customer service and stock availability. Polyflor have been manufacturing flooring products since the 1950s, when the company was a pioneer in the development of homogeneous vinyl floorcoverings. The same innovative, customer focused approach is adopted today as Polyflor work closely with contractors, specifiers and end users to understand their requirements and provide the ideal flooring solution for any installation.

## GAMMA<sup>®</sup> ILLUMINATION

▲ Designed and manufactured with the retail, hospitality and office environments in mind, Gamma Illumination launches its TTS and GTS range of fixed and adjustable LED recessed downlights, powered with the exceptional Fortimo LED SLM module from Philips. Gamma has taken one of the leading LED modules, from Philips, understood the technical features and developed a range of luminaires which convert the features to benefits for the end-users application. The TTS and GTS range provides an attractive, discreet and powerful LED downlight and gimbal solution, which lends itself to a variety of environments. The range is powered by the Fortimo LED SLM module, which offers outstanding efficacy and has been designed to optimally perform in combination with the Philips Xitanium LED driver and backed by the Philips system guarantee.

▼ Wobedo's vision is not only to create a better and more balanced acoustic environment in working places, but also to create products that will enhance the beauty of the interiors, and add harmony. Choose between the soft shapes of Woolbubbles or the graphic and sharp Squarebubbles. The sound absorbing tests have shown some of the best results among wallpanels and Wobedo is happy to show the results.
