

GENERAL

The fitting of My Place Air™ is made with hooks or loops screwed to the ceiling. Screws and plugs are not included as they are dependant on ceiling construction. When hanging several panel rows, the distance between the hooks depend on the diameter of the panel.

Panel Ø	Distance between hooks
900 mm	1050 mm
600 mm	750 mm
400 mm	550 mm

FITTING

Wire grip with hook, and Ø 1,5 mm wire with loop, 1500 mm.

Pull the wire through the top eyelet and then through the loop.

Push the wire through the wire grip and hang it in the hook in the ceiling. Adjust to appropriate height by pulling the wire through the grip while pressing the adjustment button on the bottom.

CONNECTION

Wire 300 mm with key ring mount and wooden ball Ø 20 mm.

For connection vertically and horizontally, use the wire with key ring mount and wooden ball.

The distance between all panels, both vertically and horizontally is set to 150 mm.

ENDING

Wire 300 mm with loops in both ends. Wooden ball Ø 40 mm.

Pull the wire through the lower eyelet and then through one of the loops. Press wire and eyelet together to make it hang straight.

Press the other loop together, push it through the wooden ball, then open the loop up again to create the ending.
