

With over 100 years of combined experience, HydroSolutions offers services to help our clients understand their water rights and develops strategies to maximize their value.

TOUGH QUESTIONS

1. Can your water rights survive a challenge from other water users or govt. agencies?
2. Does your water right certificate reflect your actual historic water use?
3. How would you defend your rights in Water Court proceedings?
4. Are you considering a change from flood to center pivot irrigation, or some other use?
5. How can you improve your water use efficiency without jeopardizing your underlying water rights?
6. Where would you collect all the required documentation to file for a new water right or to change a diversion point or place of use?
7. How would you evaluate your water rights for sale or lease?
8. Do you need a water rights specialist experienced in working with attorneys and qualified as an expert in court?
