

# SAY GOODBYE TO SOGGY PIZZA!!

## ***The Solution:***

### **White Oak's Reduced Moisture "RTE" Vegetables**

- Reducing the moisture minimizes weeping (syneresis) that often occurs when conventional IQF vegetables thaw.
- The result is a fresh tasting pizza that is crispier and more flavorful than pizzas topped with standard IQF vegetables.
- White Oak's proprietary all natural *Reduced Moisture* technology eliminates extra water and includes a pasteurizing step that ensures a safe, *Ready to Eat* product.
- Reduced Moisture "RTE" vegetables retain better flavor, color and nutrition, and are guaranteed pathogen free.
