Reference Group Data Report

Spring 2013

The ACHA-NCHA II supports the health of the campus community by fulfilling the academic mission, supporting short- and long-term healthy behaviors, and gaining a current profile of health trends within the campus community.

Demographics of Participating Institutions

Thirty four Canadian postsecondary institutions self-selected to participate in the Spring 2013 ACHA National College Health Assessment and 38,171 surveys were completed by students on these campuses. For the purpose of forming the Reference Group, only Canadian institutions that surveyed all students or used a random sampling technique are included in the analysis AND agreed to have their data included, yielding a final data set consisting of 34,039 students and 32 schools. **This report presents data from 5,122 students at 4 schools in Alberta.** *All schools collected data via the ACHA-NCHA web survey. The mean response was 24% and the median was 23%.*

Demographic characteristics of the 4 Alberta campuses follow:
