Send us an email letting us know how many you've made or plan to make, and we'll let you know where to post them.

Simple Snood

Materials

200 grams of super chunky wool
(We use Wool and the Gang's Crazy Sexy Wool)
15mm knitting needles
Knitter's sewing needle

Tension

10cm x 10cm = 7 stitches and 10 rows

Finished size

Before sewing: 25cm wide x 60cm long

After sewing: 25cm wide x 30cm long

Pattern

- 1 Cast on 17 stitches.
- 2 Knit every row until you nearly reach the end of the ball or until the piece measures approximately 60cm in length. Leave at least 200cm of yarn.
- 3 Cast off all stitches.
- 4 Sew the cast on and cast off edges together to create a large knitted loop.
- 5 Weave in ends.

We've chosen super chunky wool and chunky needles to create a fluffy and warm snood that can be knitted up in no time. We think a 25cm x 30cm snood makes for a perfect snug fit for an adult.

If you have different sized needles and yarns, ensure you cast on enough stitches to create approximately 25cm width of knitting. If you're not sure how many to cast on, try a swatch: Cast on 10 stitches, knit them for a few rows and measure how wide your knitting is. From this, you can work out approximately how many stitches you will need to make your knitting 25cm wide.

Straight knitting needles
