

Question:

How do I communicate with my leaders who don't use email?

Answer:

Follow these steps if you want to send a text or tweet a link instead of an email.

- Go to their contact card on your contacts page.
- Move your cursor to the top right corner and click the pencil to reveal this menu.
- Click "Get this contact's invite link" and then copy it. You then have the choice of sending it in your own email explaining what to do with it, tweeting it to them, or sending it in a text. The last two options allow you to avoid email altogether. Remember, each invite link is unique to the user you are inviting.
