RosettaHealth™ Community Portal enables community members to have access to referrals, patient records, secure messaging and notifications. All of this is available via the world’s largest trust network. Simple interface with workflow allow easy management of referrals and documents.

Simple, Clean, Efficient

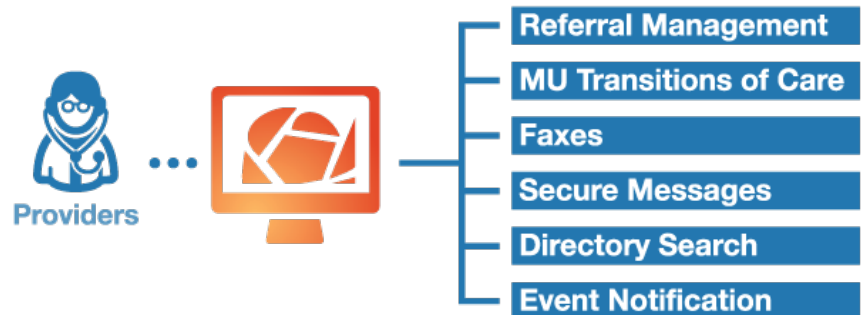

Our portal is designed around improving the workflow of referrals, health records and messaging. With electronic records, fax and messaging in one clean interface, the Community Portal makes facilities more efficient.

Connect Everywhere There’s Care

Wherever care is provided, the Community Portal allows access to patient records — hospital, ambulatory practices, post-acute, home health and Telehealth.

Works with All EHRs

Our portal can exchange clinical records and messages with any EHR. Leveraging our cloud-based HealthBus platform, Direct Secure messaging, and the DirectTrust network, get connected without any software installs.

Feature	Community Portal	EHR Portals	Referral Software
Communicates with all EHRs out of the box. No setup and no installs	●	◐	○
Uses largest trust network - DirectTrust	●	◐	○
Supports referrals, MU Transitions of Care, faxes, and secure messaging	●	◐	◐
