Electric Speak! Junk for Me!

Text Part I

(1)

I'd like to start off by saying that I have no plan, no objective, no idea. I hate pieces that use text like its a cheap theater. Here we are. Who was speaking just now? I suppose I technically was, but this is not my voice, or at least this isn't my voice yet. Perhaps I am a character, a parody of myself. A slow speaking, meandering, non-entity. Non-entities do not speak.

Here's what I really should be asking: how can I embody my own self? Electric junk! Speak for me!

Today I face a fear - not my fear, but certainly *a* fear. A fear where I lay awake at night knowing I have things to say. A fear where I lay awake at night knowing I have no ways to...

So live vicariously through your own words! It is possible to exist through your external transcription, your external reproduction. Words, text, miming, music definitely don't translate thoughts. I know this, trust me.

Was now speaking just was? Technically I was I suppose, this my voice is not but, isn't this my voice yet or at least. Character, parody myself, perhaps am I. Speaking a slow, non-entity, meandering. Do not speak, non-entities!

What I really should here be asking: I can embody how my self own? Junk electric? Me speak for!

A fear today I face - my fear not, certainly but a fear. I lay awake a fear night at knowing things have I say to. Ways to have no knowing I fear at night a lay I where awake...

Through your words live so vicariously own! Possible through to external exist it is transcription, external reproduction your. Words, text, miming, music thoughts translate don't definitely. Know this, me I trust.

Text Part II

(1)

Here speaking electric isn't easy! Forget starting to already voice I'm which is voice my which is not and my, core this is not the electric of what speech makes onerous. Each new word must correspond to an buzz electric, new syllable each, new each phoneme. Cannot brain simply the fast translation my enough the. Spoken each word in the middle, my initial idea I lose - fair buzzing with sounds distracted by representations.

Forfeit responsibility but allowed to speech me has electric, hey! Fail my translations, meanings providing me useless utterances with alternate and. Given failure has me my freedom. Be impetuous with freedom to a words, a progress never to a freedom.

My words are not these, someone else's, words some non-entity's. Non-not speak do entities. Cannot speaking be a electric non-entity.

(2)

Electric isn't speaking easy here! I'm which is not my voice and already my voice is which starting to forget, though is not this the core of what makes electric speech onerous? An electric buzz must correspond to each new word, new each syllable, new each phoneme. My translation simply cannot compute the brain fast enough. In the spoken word each of middle, I lose my initial idea - distracted with buzzing representations by fair sounds.

Hey, electric responsibility has but allowed forfeit to me. My translations fail me with providing alternate meanings and useless utterances. My freedom has given me failure. A freedom to words be impetuous, a progress to freedom never.

These are not my words, someone else's, some non-words entities. Non-speak do not entities. Electric speaking a non-entity cannot be.

(3)

Electric speaking isn't easy here! I'm already starting to forget which is my voice and which is not my voice, though this is not the core of what makes electric speech onerous. An electric buzz must correspond to each new word, each new syllable, each new phoneme. My brain simply cannot compute the translation fast enough. In the middle of each spoken word, I lose my initial idea - distracted by buzzing representations with sounds fair.

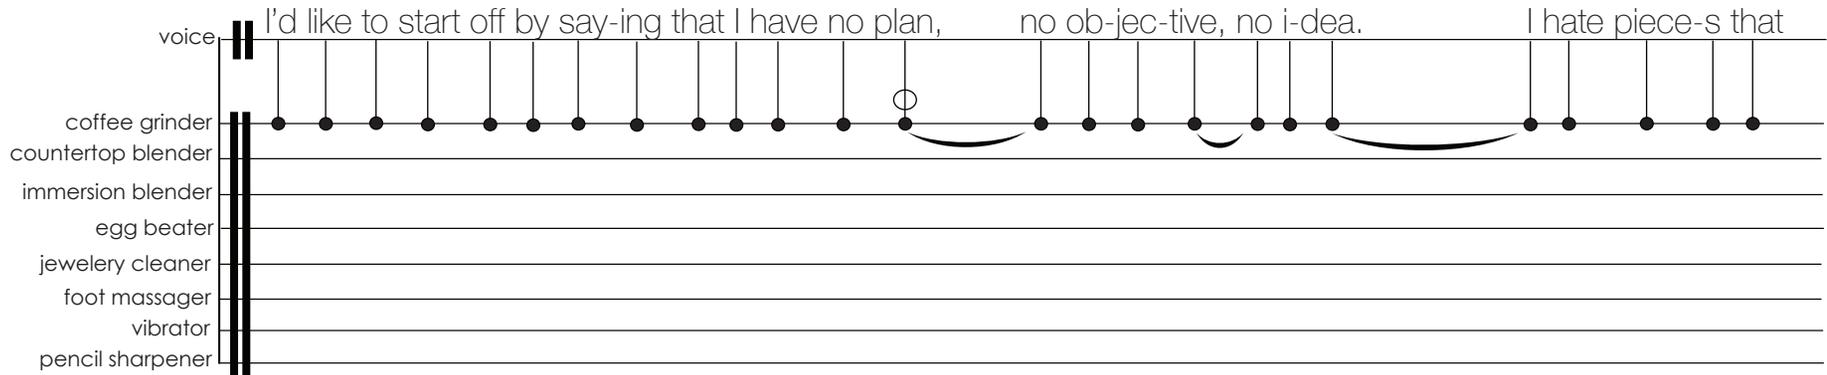

Hey, but electric speech has allowed me to forfeit responsibility! My translations fail, providing me with alternate meanings and useless utterances. My failure has given me freedom. A freedom to be impetuous with words, a freedom to never progress.

These are not my words, someone else's, some non-entity's words. Non-entities do not speak. Electric speaking cannot be a non-entity.
