

EAST BOSTON CENTRAL CATHOLIC SCHOOL

Medical Alert Form

EBCCS has the services of a registered nurse only once a week. By regulation of the Health Department, no medication can be administered directly by school personnel. This includes aspirin, Tylenol, prescription drugs, etc. Whenever possible, the dispensing of prescribed medication should be regulated according to school hours. If medication must be given during school hours, a parent, guardian, or designated adult is required to come to school to administer it. If an inhaler is needed, it will be kept in a secure cabinet in the back office. When needed the **student must be able to self-administer the correct dosage**. If you have an inhaler for your child in our office from last year, please make sure it has not expired. We are not responsible for outdated prescriptions.

Epipen: If your child has a severe allergy and has a prescribed epipen prescription, then we will need two for the school; one for the office and the other for the cafeteria. The epipens will be kept in a locked cabinet in both places, In case of an anaphylactic emergency, the staff **will** administer the epipen. You and 911 will be called immediately.

In order to be aware and to possibly prevent any dangerous reactions, we need to know if your child has any special medical conditions. Please fill out each section below which applies to your child. Your signature is needed at the bottom of the form. **Please Note:** A form is needed for every child you have registered in our school.

Student's Name _____ Grade _____

Severe Allergies- Please inform us below if your child suffers from any allergies (food, bees, etc.) which may cause an anaphylactic reaction

Allergy (Please describe in the space below the type of allergy. You may use the back of this form if more room is needed)

Does your child need an epipen for this condition? Yes _____ No _____

If yes, then we will need two epipens to keep in our school.

Other than calling you (the parent or guardian), 911, and administering the epipen, describe any other specific action that is required for your child.

Asthma –If a child has an inhaler it will be kept in the office and the child will need to know how to self-administer the correct dosage.

Action to be taken in the event of an asthma attack or to prevent one (Example: Should your child take a dose before gym?):

Other Medical Concerns If there are any other medical concerns that your child may have, please describe below. If necessary, you may use the back of this form

Parent Signature _____ Date _____
