

Sleepy Time Crib Light Operation/Safety Instructions

Read all instructions carefully.

Important safety precautions:

- Do not immerse unit into water or other liquid.
- For indoor use only.
- Do not use if there is any visible damage to the unit
- Keep unit out of reach of baby.

Operating Instructions

- Use screwdriver to open battery compartment door.
- Insert 4 AA batteries (not included) into the battery compartment, replace cover, and securely tighten screw.
- Pull the spring-loaded clip back and hang the unit on the rail of the baby crib facing baby. Be sure the unit hangs securely.
- Turn switch to one of three settings: light and sounds (top position of switch), light only (bottom position), or off (middle position).
- Unit will turn on when the sensor detects crying sounds. The light and/or sound (depending on chosen setting) will remain on for approximately five minutes.
- To turn off the unit manually, simply turn the switch to the middle position. To turn on the unit manually, simply turn the switch to the middle position and then back to either the top or bottom position. This is generally sufficient to activate the unit and turn on the light and/or sound. If the unit fails to activate, simply rub the right side of the sensor area for about 2—3 sec with your palm and the unit should activate.
- If sound should become scratchy or faint, replace the batteries immediately, (see below) The unit should return to its original volume and clarity.
- If the light fails to turn on when activated, replace the bulb with a standard night light bulb immediately (see below).

To replace batteries

- Remove unit carefully from baby crib.
- Use screwdriver to open battery compartment door and remove old batteries.
- Insert 4 AA batteries into battery compartment See diagram inside compartment for correct position of batteries
- Use screwdriver to securely close battery compartment door.
- Do not mix old and new batteries
- Do not mix alkaline, standard (carbon-zinc), or rechargeable (nickel-cadmium) batteries.

To replace night light bulb

- Remove unit carefully from baby crib.
- Remove batteries from battery compartment
- Remove 4 screws around the battery compartment
- Remove the lens cover.
- Unscrew light bulb in counter-clockwise direction.
- Replace with a new standard night light bulb.
- Place the lens cover back on the unit
- Replace 4 screws .
- Insert batteries into battery compartment See diagram inside compartment for correct position of batteries
