

### **MEDICAL DISCLAIMER**

**The content and information within [www.drcarriejones.com](http://www.drcarriejones.com) is for educational purposes only. This website is not intended to diagnose, treat, take the place of a primary care health provider, take the place of a visit with your health care provider or establish a doctor-patient relationship with Dr. Carrie Jones. If you are experiencing a life threatening emergency, please immediately dial 9-1-1.**

**Questions/comments posted on blog articles/Facebook/Instagram could be viewed by the public and therefore do not follow HIPAA standards. Do not post questions/comments about your personal health or the health of others if you do not wish for your posted information to be seen. If you choose to publish/submit personal health information on blog posts (or other areas where comments are allowed such as Facebook or Instagram) by your own volition, please be aware that any responses made will also be public and are not intended to diagnose or treat or establish a doctor-patient relationship. By posting questions/comments to [dr Carrie Jones.com](http://dr Carrie Jones.com), Twitter, Facebook, or Instagram for Dr. Carrie Jones, you acknowledge these sites are not HIPAA compliant, are public, and you are voluntarily giving permission for any personal health information to be seen by others. Dr. Carrie Jones reserves the right to block or delete any comments deemed inappropriate for the site(s).**

**Any and all emails sent to the contact at [dr Carrie Jones.com](http://dr Carrie Jones.com) site are not HIPAA compliant. By voluntarily sending an email to the contact you acknowledge the emails are not HIPAA compliant and are voluntarily giving permission for any personal health information included to be seen by others at The Happy Healthy Woman. Please be aware that any responses made are also not HIPAA compliant nor are they intended to diagnose, treat, or establish a doctor-patient relationship. Dr. Carrie Jones reserves the right to refuse to answer any emails specifically pertaining to private patient health information and referring that person back to their primary health care provider.**
