

Health Security Timeline

Passage:

The Health Security Act will be introduced for passage during the **2021 legislative session** (Jan.-Mar.).

Setup phase:

After passage of the bill, the Health Security Plan will move into the setup phase, an estimated 2- to 3-year process.

During this time, the finer details of the Plan will be worked out, with public input. An Affordable Care Act waiver to set up our own state plan will be sought, and agreements will be negotiated with federal and state agencies and with health care providers.

Implementation:

After the setup phase is complete, the Plan will begin operations!
