

# VaasaETT partnering with EUW18

European Utility Week is the premier landmark event in Europe for the entire smart utility sector, accumulating over 12,000 international smart energy stakeholders and 600 exhibitors.

It is a dynamic and energizing 3-day business, innovation and information platform in the form of a conference-led exhibition. The event facilitates greater networking and content sharing opportunities across the entire energy spectrum from generation to end use. The programme is developed to serve every level of the utility value chain in the form of a strategic and policy forming environment during the exclusive Summit and the more practical case studies presented during the Hub Sessions, free to attend for all visitors.

**6-8 November 2018, Vienna, Austria**

6 - 8 November 2018 | Vienna, Austria
