

DO NOT LET YOUR COUNTY BE COLLATERAL DAMAGE TO INDUSTRIAL WIND

"If I were a swindler, if I were committed to committing fraud, I would be in green energy. If you want to trick someone into giving you a lot of money, you have to give them something they really believe in -- you have to promise them the future."

Jeppe Gjervig Gram,
"Follow the Money,"
The Guardian,
March 17, 2016

Turbines 492[†] feet tall--187' taller than Statue of Liberty	Can be placed 541[†] feet from a property line	Can be placed 950[†] feet from a home's foundation	The wind company would benefit from an estimated Federal Production Tax Credit of at least \$130,000,000^{††}
-------------------------------------------------------------------------------------------	----------------------------------------------------------------------------	--------------------------------------------------------------------------------	------------------------------------------------------------------------------------------------------------------------------------

Industrial Wind is not sustainable without our tax dollars and government mandates.

If a **PILOT*** is granted by the Logan County Commissioners,
Logan County COULD LOSE

\$7.1 MILLION**

in tax revenue from **foreign** investors.

*PILOT =
Payment in Lieu
[instead] of Taxes

If PILOT is approved,
Logan County would
receive an estimated
\$6.4 million
in payments over 20 years

If PILOT is NOT approved,
Logan County would
receive an estimated
\$13.5 million
in tax revenue over 20 years

TELL LOGAN COUNTY COMMISSIONERS
DO NOT GRANT A PILOT

Call them at 937-599-7283

or email them at commissioners@co.logan.oh.us

Thank the following officials for having already passed opposition resolutions against the Scioto Ridge project: Village Councils of Belle Center and Russells Point; Logan County Trustees of Richland, Rushcreek, and Stokes Townships; and Hardin County Trustees of McDonald and Taylor Creek Townships.

What can you expect living with Industrial Wind? COLLATERAL DAMAGES

- Loss of property value
- Trespass zoning: Negative effects forced upon neighboring properties that cause homeowners to lose the ability to safely use and enjoy all of their property.
- High cost/low benefit ratio for intermittent, unreliable energy
- Does not reduce fossil fuel use
- Increased electricity bills
- Tower collapse; blade throw and shear; ice throw; oil spill; fire
- Numerous noises from engines and blades (gear changes, ice-on-blades, blade thumping, etc.); infrasound (felt by body, not heard); shadow flicker
- Known health issues
- Degradation/loss of ag land; Restriction of ag practices
- Rural landscape turned into an industrial zone
- Loss of wildlife and habitat
- Community unrest
- Infrastructure for more wind projects to blanket county
