Submitted to Student Senate on: October 18th, 2016

- Whereas:** Many classrooms do not have clocks.
- Whereas:** Some classrooms have clocks that are placed in a way such that when the projector screen is down, it hides the clock.
- Whereas:** Many professors prohibit laptops and cell phones during class.
- Whereas:** By putting clocks in classrooms, students do not need to sneak their phones to check the time, in turn getting distracted by texts or facebook notifications and ultimately detracting from their education.

**Whereas:** By putting clocks in classrooms, students may be able to pace themselves during exams, timed-writings, or keep track of time if they need to leave early for a meeting.

**Whereas:** By putting clocks in classrooms, professors may better keep track of how long lectures, exams, or activities last.

**Therefore be it resolved:** Associated Student Government supports the creation of a Clocks in Classrooms initiative to install at least one clock in a visible location in every classroom at Miami University.
