institutions in New England

88%
of New England distributors
think they'll sell more local
food in the next three years

Figures are based on survey responses from 65% of the distributors contacted (56 of 86 surveyed)

About Us:

FINE is a six-state network of non-profit, public, and private entities working collaboratively to strengthen our food system by increasing the amount of New England-grown and processed food served in our region's schools, hospitals, colleges, and other institutions.

The New England Farm to Institution Metrics Project measures the impact of the farm to institution market across the supply chain. Specifically, it shows how food procurement choices made by schools, colleges, and

hospitals make a difference for New England food producers, food distributors, and institutions that purchase food.

We believe that institutions have a central role to play in building a sustainable food system in New England. Changing institutional buying patterns to include more regionally-grown food is not always easy, but it brings many forms of value to Rhode Island's farmers, consumers, communities, and economy.
