

**aerial
DESIGNS**

"The ABS helped us increase guest throughput and margins significantly. Originally, we expected to start one tour per hour, but quickly increased volume to two per hour. The system is simple to operate, safe and robust, and easy to maintain. We now anticipate running three tours per hour when we reopen for next season!"

- Josh Sears, ZipZone Adventures

ABS

Aerial Braking System

**Engineered to Increase the Fun
and Profitability of New and
Existing Zip Line Tours**

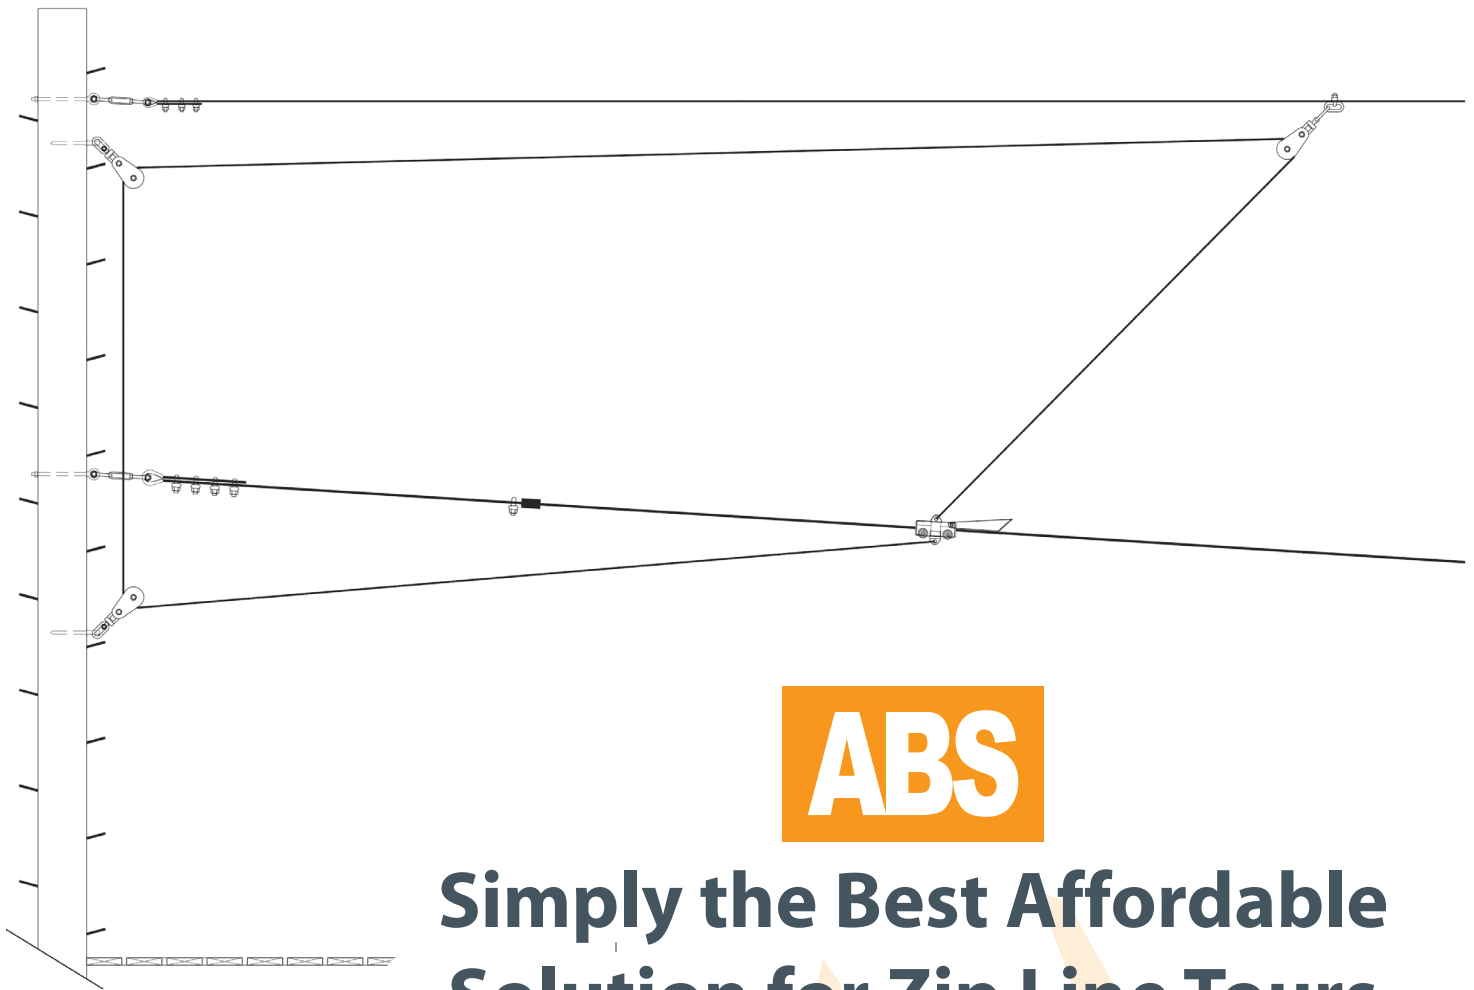

"The ABS brake block is one of the best zip line braking system on the market! It minimizes retrievals with its ability to catch the trolley every time, and allows staff to stop guests with ease. The system is easy to use and trainees learn to use the brake very quickly."

- Lori Pingle, Get a Grip Adventures
