

San Francisco International Ocean Film Festival 6th Annual Student Film Competition

Film Resources

Here are some resources you can use to help you make your film!

Looking for Video footage?

The National Marine Sanctuaries maintain a photo and video library where you can download video footage and photos for free and use them in your film. Please pay attention to the Use Rights and Credits for using the images and/or videos in your production.

Free Photos!

Information about habitats, science, and current events and free photo library

This website is chock full of information about the coastal ecology between Sonoma county and San Luis Obispo. You can search for information about habitats, science projects, and download images that are available for use for free (with proper credits)

<http://sanctuarysimon.org/>

Data Visualizations by NOAA

This link goes to NOAA's Data Visualizations webpage where you can search for animations and visualizations that interpret atmospheric and/or oceanic data. These could be helpful in communicating a big concept such as global climate change. With proper credit, these visualizations can be used in a student produced video.

National Marine Sanctuaries

Did you know that like National Parks, we have National Marine Sanctuaries in the Ocean? Learn more about them here? Do you live near any of them?

<http://sanctuaries.noaa.gov/>

Whether you live on the coast or thousands of miles away from it, we are all connected to the ocean! Tell us your story!
