

PANMetro™ Dedicated Ethernet Ring

Cleareon's PANMetro™ Ethernet Ring service – offers carrier-grade, fully diverse, Ethernet connectivity plus SLA performance monitoring and assurance reporting

When our network grows, your network grows!

Cleareon's PANMetro™ is a multi-gig (up to 10 GigE) Ethernet Ring service that provides customers the ability to leverage Ethernet Ring technology to obtain dedicated local access. In addition to providing fiber based, high capacity, carrier-grade metro Ethernet solutions, Cleareon can convert legacy network connections to Ethernet over a wide area, stretching from Connecticut to Southern New Jersey.

As with all of Cleareon's lit services, PANMetro™ includes an SLA performance monitoring and assurance reporting customer portal that proactively identifies issues and reports, to the second, across circuits to improve service delivery and reduce operating costs.

Cleareon takes the guesswork out of which Carrier Hotel Meet-Me Room or Data Center to colocate in... CONNECT TO THEM ALL with PANMetro

PANMetro™ provides dedicated Ethernet connectivity to Northeast US Carrier Hotel Meet-Me Rooms and Data-Centers. Capacity is transported over a fully diverse, ring protected, carrier-grade Metro Ethernet Architecture.

Connect to an entire diverse customer base within area Meet Me Rooms and Data Centers, over your own private, secure, dedicated 10 GigE, GigE, or 100 Meg Metro Ethernet Ring without the need for colocation space, equipment and power!

- 100% Fiber Optic Network ▪ Micro-Second Latency assured through Pangaea's Network Performance SLA ▪
 - Diverse, Protected Fiber Ring ▪ Guaranteed throughput, NO shared bandwidth ▪ QinQ and QoS ▪
- Dual Entrance Facilities ▪ Cleareon Provided LOA/CFA at each location or pass-through x-connect ▪
 - Reduced Meet Me Room x-connect fees through Cleareon's aggregate purchase rate ▪

Cleareon Fiber Networks, LLC provides high-speed carrier-grade Ethernet services and dark fiber-based infrastructure solutions to telecommunications carriers and large enterprise customers throughout NYC and the tri-state region.
