

A true intercultural experience

Argentina, the second largest country in Latin America, is a country of warm, **outgoing** people and **diversity**, where immigrants from Italy, Spain, Germany, and many other countries, mixed with the local inhabitants and created a **unique culture**. Argentina's diversity is not only found in the culture, but also in its landscapes and climates; there are jungles and subtropical climates in the north, and ice fields and polar climates in the south. Small and big towns, different dialects, foods, and dances; Argentina is an **adventurous** place with many small cultures that will be part of your everyday.

In your sparetime you will be able to **explore** the Argentinian culture: try the traditional barbecue called *asado*, drink *mate* with your friends, join the excitement of watching a football game with the locals, get a lesson in tango, and **enjoy** the beautiful views of the natural surroundings.

YFU ARGENTINA

YOUTH FOR UNDERSTANDING
Argentina

*Finished High School
without going on **exchange**?*

SECONDARY AND UPPER EDUCATION

take part in a lifelong journey

YFU offers the journey of a lifetime, an adventure that reveals the best in people, and enables you to make lifelong connections that will change the way you see the world.

Student exchange involves moving to a foreign country, living with a host family, and attending school as a local student. The experience will enhance global understanding by deepening the appreciation for other cultures and customs.

A YFU exchange experience will expose you to everyday life in a different society. Take part of recognizing that we are citizens of one single world.

The Program

This program is for students from 16 to 19 years old who want to experience how upper studies are in Argentina. The combination, of the Argentinian secondary school and upper education institution, gives you the possibility to study abroad in or after your last year of high school.

This 10 month program is divided in two. Students are expected to attend school during the first five months and improve their performance as they get adjusted to the language and school system. During the second half, you will attend to an upper education institution. This could be: University, Academy or other post secondary educations.

You will have the opportunity to experience two different academic environments. In the upper education you will already be speaking the language, which enables you to participate and get involved in the lessons. Throughout the year, there will be YFU-activities where you can meet other international students, share experiences, and explore some of the famous sights of Argentina.

Your host family will be a very important part of your exchange experience. Your home-activities with them will take up a lot of your daily life. All families share their own traditions, holidays, and costumes, offering each student a unique, personal version of life in the host country and an understanding of its diversity. Be fascinated by the cultural differences between you and your host family, and take part of their culture.

Going on exchange is an important part of life that everyone should experience, to further understanding between cultures, religions, ways of living, including learning a new language.
