Here to raise the bar on innovation, meet the new legend,

# ecopr<sup>am</sup>s®

innovation for baby, innovation for you

Their mission is to provide solutions for families striking the perfect balance of technology, style, sustainability, practicality, soothing needs and entertainment. Environmentally responsible, and sympathetic to the needs of children and the adults that care for them, they use stylishly-comfortable and eco-friendly materials. And with smart-coded software built in, EcoPrams are taking pride in delivering products of the future. Say hello to the future, now say hello to their first-born,

## The EcoSwingi

Designed by EcoPrams, the EcoSwingi was created to deliver the best of innovations, a stress-free life, and advanced entertainment features for *the love of luxury*. Their dream is to deliver parents with *the best of British engineering*.

Their designer and catwalk inspired range of pushchairs transform from single to double. Tested to meet, BS5852, ASTM F833, CE, IP66, EN71-1/2, EN1888-1/2 and other relevant testing standards covering North America, Middle East, Europe and Asia Pacific, the brand commits to serving customers seeking exceptionally talented infant and child goods. Established since 2013 and protected since 2011, EcoPrams are the first to introduce the canopy-based and pivot based shopping basket on prams and strollers, swing for strollers and bumper toy to the world at large.

Their main focus is to deliver new generation solutions to problems facing parents in the 21st century.

To move beyond the traditional five senses, they use original smart coded software to provide parents practical options. They use super stylish comfortable fabric blends to accommodate both single and twin babies, keeping them relaxed and comforted.

The EcoSwingi collections come in three colour-choices, and positioned to be on sale before December of this year. The ranges comes with a seat and carry-cot in one, a rain-cover, mosquito net, a sunshade and a full climate hood with SPF lining. Their compactness fold and clever mechanics for easy transportation make for true urbanite practicalities.
