

Organizing Boards

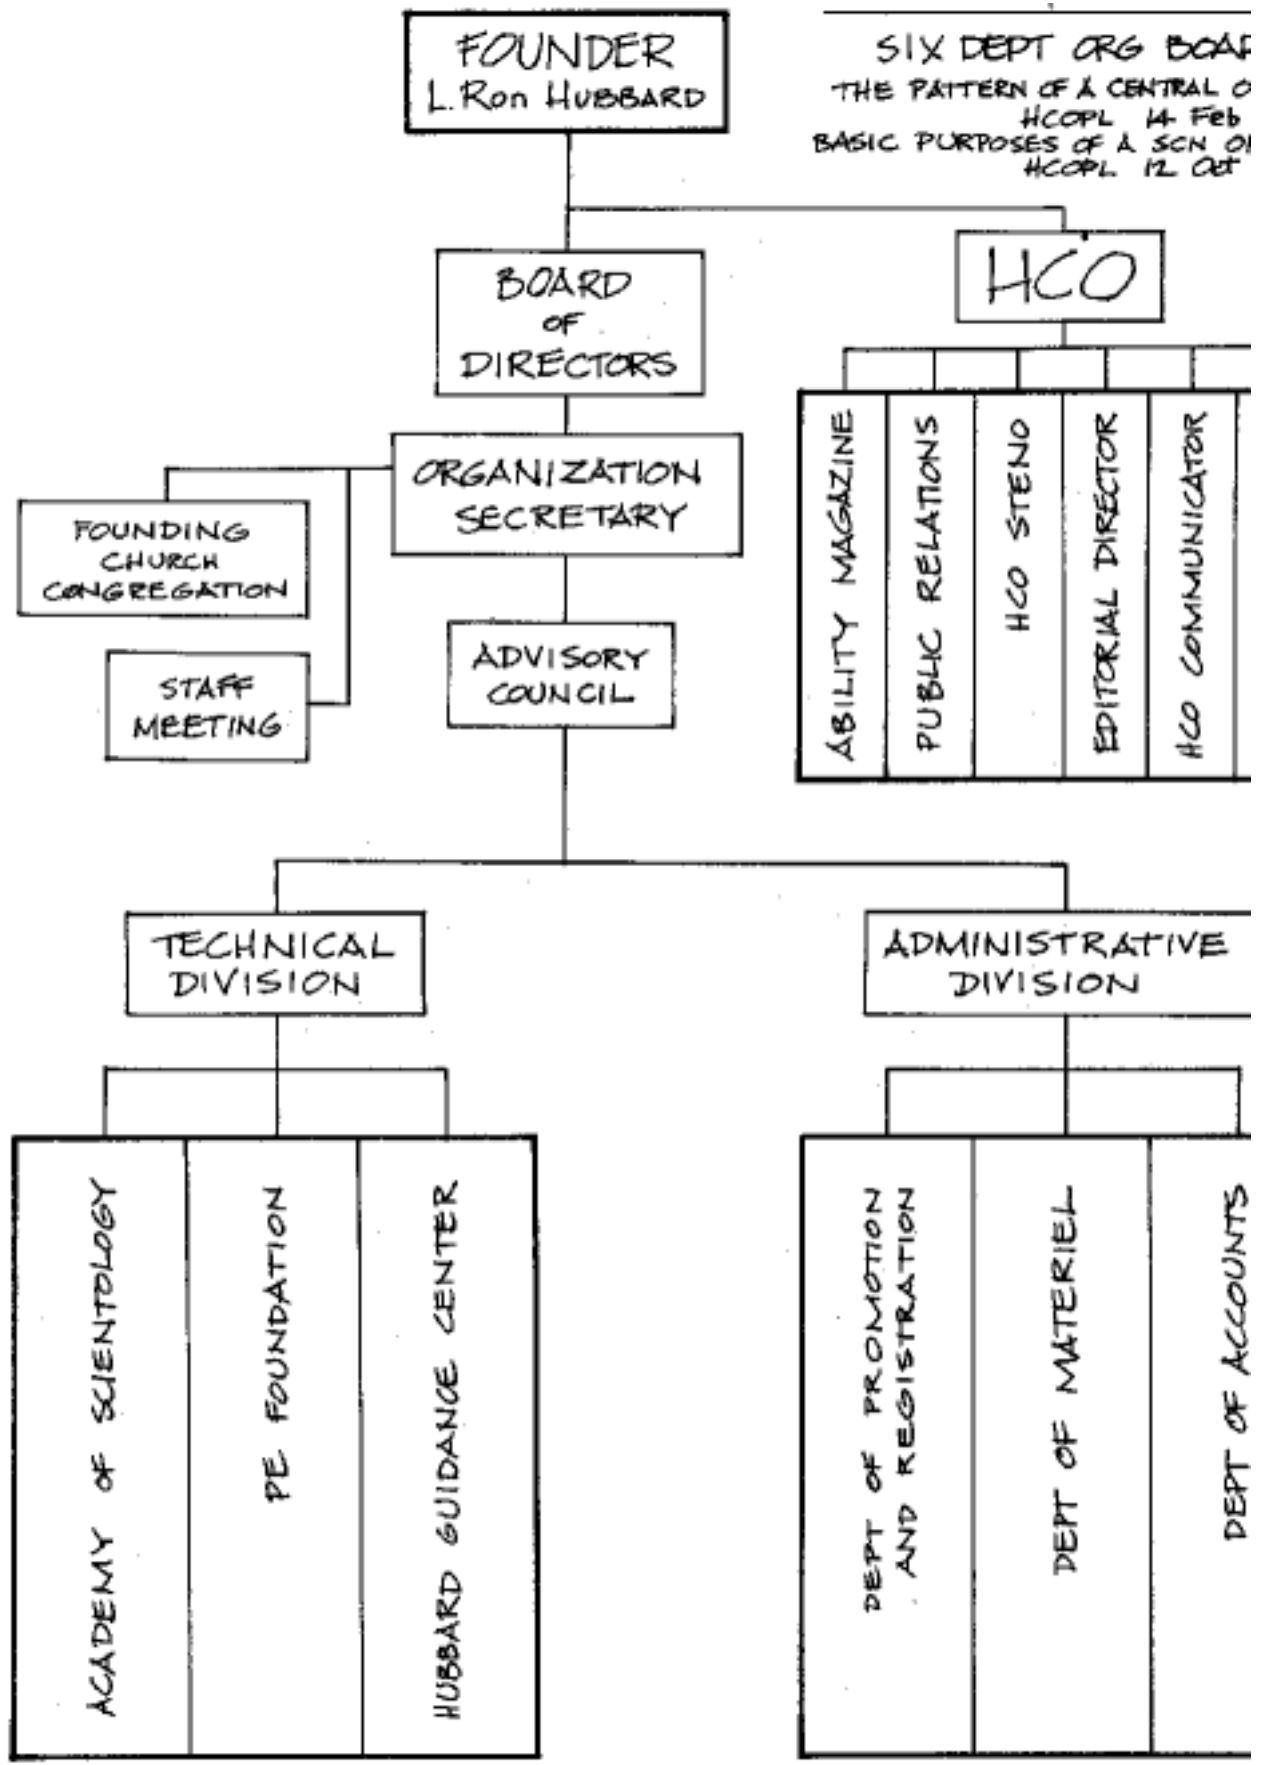

This Section shows several diagrams of major Scientology Organizing Boards used between 1961 and 1976. These are basic outlines showing mainly the divisions and/or departments of each organization. In reality each of these org boards would have a lot more post titles on them and the sections, units and functions would also be written in.

A lot of post titles, functions, divisions, departments, bureaux, etc., defined in this dictionary refer to or belong on these org boards.

Thus the purpose of this section is to briefly show the organization form that the definitions refer to. At the right hand corner of each diagram are the references that each board is based on.

It is easy to see that all Scientology Organizing Boards since 1965 have been variations of the Seven Division Org Board of 1965, which is *the* basic Scientology org board from that time forward. Any business activity could be adapted to run more successfully on the Seven Division Org Board of 1965.

Please note that the Org Boards shown in this section are not the most recently authorized Org Boards. New Scientology Org Boards will soon be released.
