5 Reasons to Sign Up for Coverage Starting in February

This Open Enrollment has been record-breaking; during peak times, they've had more traffic on Nevada HealthLink than ever before. Nationally, more than 11.3 million people have already signed up for Marketplace coverage for 2016, including 3 million new people and almost 4 million people under age 35.

American families across the country are finding out that coverage is affordable, and thanks to new protections like preventive services at no extra cost, it's better than before the Affordable Care Act. That's why 17.6 million Americans have gotten covered since the law's provisions have taken effect, and why our nation now has the lowest levels of the uninsured in history.

And there's still time to get covered! Open Enrollment on HealthCare.gov ends at the end of January, but if you want coverage that's guaranteed to start on February 1, you need to sign up before the end of January 15. Nevada's Community Health Centers are offering free enrollment assistance. [Click here for more info.](#)

Nevada Primary Care Association (formerly Great Basin Primary Care Association) (NVPCA) is the federally designated Primary Care Association for the State of Nevada. NVPCA is a non-profit organization dedicated to assisting health centers and other community based primary care organizations with the implementation of solid business practices and community-responsive programs in an effort to improve service delivery effectiveness and efficiency. Our work is based on maximizing resources, developing a strong intersection between medical care and public health at the community level, and using sound business sense in developing capacity to serve those who do not have access to mainstream health care. NVPCA is located at 755 N. Roop Street, Suite 211, Carson City, NV 89701. For more info go to www.nvpc.org.
