

## TM116 - Technology Project Manager for Social Enterprise

Looking for a talented, reliable, hardworking, creative and intelligent candidate to join a team of people who are planning to revolutionise education.

Numberfit is an award winning concept in numeracy and problem solving for pre-school and school aged children from 3 years to 12 years. Its' aim is to get children's minds and bodies in shape. Using a multi-sensory teaching methodology combined with fitness in order to help every child enjoy learning.

Take a look at the video on our website [www.numberfit.com](http://www.numberfit.com) to see what we do.

We are in the process of designing and building an online numeracy world, maths based books, characters, apps and much more! We have many great ideas and plans and are looking for someone to help them come to life. The position will start initially on a contract basis, but this could lead to a permanent role for the correct candidate.

We are now at a critical turning point, and in order to expand to meet the demand we enjoy, we are introducing digital elements into each one of our projects. For this, we need a digital/technology project manager to make it happen – to bring people and resources together to bring these ideas to light.

We need someone to come up with and execute solutions for what technology could be used to achieve our objectives, what it could look like, how it could work and how and when it could be delivered.

The role will include:

- Creating a mobile teaching platform;
- Augmented Reality development;
- Introducing an online tutoring platform; and
- App development.

In order to apply, please forward your CV to [enquiries@numberfit.com](mailto:enquiries@numberfit.com) using the **subject line TM116**.

We are based in Amersham on the Metropolitan line.
