

T116 – Science Tutors

Numberprep offers one to one and group tuition to children of all ages. We currently run a specialist mathematics tuition centre in Amersham and enjoy high demand and remarkable results. We are looking to expand our offering to include Science tuition all the way up to A-level. As a result we are looking specifically for somebody who could help with Chemistry and/or Biology and/or Physics lessons.

Tuition takes place in our offices - after school, at weekends and during school holidays – hours can be flexible to suit your needs.

Although no experience of tutoring is necessary, you should have the necessary skills to enable you to work with children and young adults. Hourly rates are negotiable depending on your experience.

You should be educated up to A-level standard with a very strong level of science and maths.

Please apply with a covering letter and CV. **The subject line should be T116.**

We tutor children from Key Stage 1 up to A-level. In your application, please state which age group you would be happy working with.
