

Pete knows buildings

Both in the field, and on the stand.

Pete's construction career began with digging ditches over 30 years ago, and since then has included almost every construction role. In 1995, he founded Pete Fowler Construction Services—a team of building experts and project management professionals helping clients make smart, informed decisions about their buildings. PFCS technical experts are often called upon to consult and testify in property-related claims and litigation. Pete has vast experience providing successful expert witness testimony in both state and federal court—including more than 100 depositions, arbitrations, and hearings.

“LET’S BUILD A REAL CONSTRUCTION CONSULTING BUSINESS”

Pete Fowler is passionate about helping people make tough decisions. When founding PFCS 20 years ago, Pete was committed to running a business with unwavering integrity. Today, he has helped countless people navigate the complexity of construction, solve challenging building problems, and get their projects back on track.

ON THE ACADEMIC SIDE

Pete has conducted construction and building related research and published numerous articles—including the first national publication related to construction defects, and one of the earliest on mold management. With a degree in Construction Management and a minor in Information Systems, Pete designed PFCS' world-class proprietary technology system to collect, organize, structure, share, and permanently store documents and building information. He has moderated building science symposia, and been invited to speak by the most prestigious national construction organizations.
