

Adam knows buildings

Building Expertise

Adam's career in the construction industry began over 20 years ago as a pipe bender and fabricator where he learned the fundamentals of construction materials technology. Intrigued by the industry, he went on to Brigham Young University and earned a Bachelor of Science in Construction Management. After graduation, Adam earned a Nevada General Contractor's license, ICC Residential and Commercial Building Inspector licenses, and certification as a Tribometrist, measuring the slip resistance of floors. He is still a student of construction, reading and annotating dozens of industry articles and books each year.

DEPTH OF EXPERIENCE

Adam has committed his career to solving construction challenges and developing pathways to better building. Adam's professional experience includes roles with some of the largest hotel and retail chains in the U.S., project management on industrial and commercial installations, as well as a diverse portfolio of projects ranging from single family home improvement to large-scale construction management.

DELIVERING EXCELLENT SERVICE

As a Senior Consultant at Pete Fowler Construction Services, Adam provides consulting services to public and private owners, design professionals, contractors, and attorneys on high-impact projects. He consults on various assignments including construction defect litigation, construction contract disputes, damage-for-delay disputes, construction code compliance, construction safety, building inspections, and job site accident claims. Adam is an expert in the areas of slip-trip-fall claims, slip resistance and walkway safety.
