Learn at Home
HOW TO CREATE A PRODUCTIVE LEARNING ENVIRONMENT AT HOME

1. Create a dedicated "workspace" for academic activities with all essential supplies needed to work.

Print out visuals to mimic your child’s classroom morning routine such as put a calendar on the wall, go through the days of the week, talk about the weather and the season, etc.

2. Create a daily schedule and hang it in a visible area to easily follow and monitor.

3. Keep a consistent routine, especially in the first week of implementing your schedule.

4. Create zones for learning such as reading nook where kids can go for quiet time when needed.

5. Use an egg timer to manage different blocks of time.

6. Manage transitions through singing or playing a favorite clean up tune.

7. Keep a tidy home! Have children help put things in their place when done with learning materials and toys. This will be conducive to learning and will promote general feelings of well-being.
