Greetings In-Depth Reviewers!

So you've decided to write about a class that possibly changed your life. Or at least one that you really enjoyed. Where to start? Make it personal. Write in your own voice. We want to hear more about the emotions the class touched on, both positive and negative. Blend that with some concise details about the material, and you've got yourself a great read.

Need some help? We've got that too. Check out this template that has been constructed to put together a successful in-depth review:
(PS: The template is just a suggestion, feel free to write however you’d like!)

Introduction.
What course will you be talking about?

Why?
What made you decide to take this class and why were you interested in the topic?
What problems were you trying to solve by taking this class?
What goals did you have in mind for post completion?

History.
Give some background and history on the class (if it has any)

Lecturer.
Give some background and history on the professor. What makes them a subject matter expert in this topic/field?

Your Skills.
Describe your background and skills stepping into the class.
What classes have you taken that prepared you for it?

Success.
Describe to the reader, based on your experience, what you will need to be successful in this course.
What pre-requisites would be needed to be successful?

The Course.
Talk about the nuts and bolts of the course. All the gritty details and technical information.

Grading.
Talk about the quizzes, tests and how fair/unfair the grading was.
How hard was this class to pass?

Time Commitment.
How much time did you spend a week on this course?
Was it more or less than what the syllabus suggested?

Conclusion.
Wrap up your review by providing a concise statement about the course.
Were you successful in completing the course?
What Next?
Find some classes that you think would be a good fit to take next that are similar.
