**Coordinated capacity building**
- Establish comprehensive model of capacity building that incorporates all sectors of Model National Response
- Establish coordination between countries conducting bilateral capacity building
- Dedicated training for policy leaders to develop Model National Response
- National and regional policy leaders trained to identify strengths, gaps and opportunities

**Outcomes**
- Renewal of high-level commitment at a national and international level
- Sufficient funding, focus and legal frameworks in place at a national level to prevent child sexual exploitation and abuse internationally
- Resources are pooled to identify, pursue and arrest offenders and rescue victims
- Successful joint investigations and prosecutions are conducted
- Victims have access to the support they require
- Industry, leverages and legislation to prevent their platforms being used as a tool for abuse
- Government and non-governmental organisations use technology and legislation to ensure platforms are not used as tools for abuse
- Children are protected from sexual exploitation and abuse, no matter where they live. Parents are empowered to protect their children from online harm, no matter where they live. Public action holds government and companies accountable

**Capabilities**
- Politically will: Accountable leadership and a willingness to collaborate at the highest level. Adequate government resources dedicated to fighting the epidemic
- Legal: Comprehensive technology, including common definitions, terminology and thresholds to facilitate the harmonisation of criminal offences, obtain evidence, hold the private sector accountable and prevent unaccountable "sovereignless" companies
- International commitments: To capacity development (both cross-border technology-based improvements and systemic improvements within countries) and the prevention of ineffective state response systems

**Research and insight**
- Threat analysis and monitoring: Detailed and up-to-date assessments of threats and trends
- Research to understand online vulnerabilities and effective safety education systems
- Long-term victim trauma analysis
- Ethical AI and innovation

**Partners**
- National governments, regional organisations, UN agencies and industry partners
- National law enforcement, Interpol and regional partners
- National and international civil society organisations with specialist expertise
- International and national technology companies, industry associations, and national and international law enforcement
- National governments, regional organisations, international and national civil society organisations
- National governments, regional organisations, international and national civil society, academia, industry and law enforcement
