

I am a high achieving individual with a flair for creativity and a disciplined work ethic. My experiences illustrating outside and inside the animation industry, school captaincy and in retail has allowed me to develop skills across various areas. I work my hardest in any task given to me to receive the best result. Being an artistic student, I benefit from my creativity. If things don't go to plan, I'll carefully evaluate the situation and quickly establish a new method for success. I am a good communicator with an interest in helping others. There were many times during my various roles where I had to communicate and aid people of all ages, some of which I had only just met. If I was given a job, I am confident I would accomplish all tasks with constant enthusiasm and dedication.
