

POSITION: Lead UI / UX Designer

ROLE DESCRIPTION:

The lead UI / UX designer is responsible for everything from the Lea(R)n brand to optimizing the user experience on the LearnTrials platform. This includes maintaining the Lea(R)n style guide, creating sales and marketing assets, designing user interfaces and performing user experience testing. This role is a combination of two traditional roles, graphic design and user experience design. The lead UI / UX designer reports to the CTO.

SKILLS AND QUALIFICATIONS:

The ideal candidate will have 5+ years of graphic design experience and 3+ years of user experience design experience. The candidate must have significant experience working with Photoshop, Illustrator, wire-framing software (Balsamiq) and mockup software (Invisionapp.com). Any experience managing development teams or direct reports is a plus.

EXPERIENCE:

5+ years of graphic design
3+ years of user experience design

LOCATION:

Raleigh, NC

ABOUT LEA(R)N

We are educators, technologists, researchers and ninjas equipping educators and their organizations to know which products are best for their classrooms. Our research-backed, online platform, LearnTrials.com, combines teachers' rapid insights with multiple data sources, to improve instructional and budget decisions.

Lea(R)n is a high-growth, funded, certified "B" ("for benefit") corporation; previously a Kaplan Techstars and AT&T Aspire accelerator participant, we've been named the 2014 North Carolina Technology Company of the Year in Education, a 2015 SxSWedu LAUNCHedu awardee, and a Bill & Melinda Gates Foundation grantee.
