WARNING

Drinking wine in moderation will enhance meals by making food taste better, will stimulate the appetite and digestion while improving the disposition of the drinker. Its use near candlelight, especially in small, intimate restaurants, is a known stimulant of romance, which could cause pregnancy, lacking appropriate precautions.

It is a non narcotic aid to reducing stress and tension and has been found to encourage sleep in the insomniac.

Wine has been recognized for its purity by virtually every civilized society throughout history and has been used as food, medicine and religious sacrament.

Recommended dosage is 1 to 2 glasses per meal.

Overindulgence is unwise, unfashionable & potentially unhealthy.
