For generations the Malden River was an industrial waterway walled-off to public use. The Malden River Greenway Plan lays out a vision that will transform the river, creating a world-class park system running through the cities of Everett, Malden, and Medford.

The Malden River Greenway intends to provide safe, connected and accessible paths for local residents and visitors along the Malden River. It will establish an urban greenscape with thriving biodiversity and promote a healthy lifestyle through active design and open space programming.

The development of the Malden River Greenway will become integral to an open space network that provides a key link in the larger regional greenway system.
