Field Leadership in Oil and Gas Extraction and Production

Improving Working Relationships in Challenging Environments

Course Objectives
This course is designed to prepare your staff to:
1. Recognize the advantages of adapting one's social style to improve work outcomes when supervising crews;
2. Effectively instruct, mentor and support workers to achieve work goals;
3. Anticipate and diffuse issues or potential problems as a strategy to reduce conflict;
4. Understand the role of the field supervisor in reducing loss and improving processes;
5. Comprehend the relationship between job planning and improved work outcomes; and
6. Effectively lead and communicate while conducting a simultaneous operation.

Course Content
The Field Leadership course is comprised of six (6) modules concluding with an exercise designed to emulate a simultaneous operation (SIMOP). The modules cover the course objectives as follows:
Module I. Interpersonal Behaviors
Module II. Developing Worker Potential
Module III. Problem Solving and Conflict Resolution
Module IV. Process Improvement Skills
Module V. Job Planning
Module VI. Simultaneous Operations

The course focus is on attaining a balance of safety, quality and production in the upstream Oil and Gas industry. Emphasis is placed upon behavior awareness, problem solving, mentoring, situational awareness, loss control and simultaneous operations (SIMOPS). The training covers a variety of proven techniques for communication, motivation and inspiration of the workforce in order to achieve a common goal.

Target Audience
Employees moving into, and staff currently in, roles of greater responsibility and authority.

Prerequisite
There are no prerequisites for this course.

Completion Time
20 Hours
