SafeWorld and the Red Cross provide expert training that is OSHA compliant and affordable. We provide world-class instructors and award-winning courses to ensure you get training that sticks. With SafeWorld’s classroom mobility we offer you the flexibility and convenience to provide training when and where you need it.

Modular Training
SafeWorld’s Red Cross BLS training is modular, providing you and your teams the flexibility to insert local protocols into your coursework. This way, you can train the way you actually respond to situations and focus on your teams’ specific training needs.

Course Objectives

1. To prepare teams and individuals to recognize and respond appropriately to cardiac, breathing and first aid emergencies.
2. To teach skills that teams and individuals need to know to give immediate care to a suddenly injured or ill person until more advanced medical personnel arrive and take over.
3. To explain to teams and individuals the value of asking questions when he/she does not understand a certain aspect of the skills and knowledge training.
4. To emphasize the need for rapid medical assistance in an emergency and the importance of the role of healthcare providers and professional rescuers in the community.

Target Audience
Designed specifically for healthcare professionals, EMTs, police officers, firefighters and other careers with a duty to respond in medical emergency situations. Through reading and lecture with hands-on experience, our BLS training allows you to learn new techniques and sharpen your skills so you can deliver care to those in need and help improve patient outcome. In the classroom, you’ll have the opportunity to learn from and interact with SafeWorld’s Red Cross instructor who will guide you through hands-on practice of lifesaving skills.
Course Content

The technical content within the Basic Life Support for Healthcare Providers program reflects the most current consensus on scientific recommendations. The program content includes the knowledge and skills necessary for Teams and individuals to safely identify and give appropriate care, regardless of the type of emergency. BLS courses deliver information and skills training on:

1. Scene Safety & Assessment
2. Critical Thinking and Problem Solving
3. Communication and Teamwork
4. Obstructed Airways and Breathing Emergencies
5. Cardiac emergencies and CPR
6. AED use and procedure
7. The Emergency Medical Services System
8. Legal Considerations
9. Precautions

Prerequisite
There are no prerequisites for this course.

Completion Time
4.5 Hours Classroom Course

Student/Instructor Ratio
12 to 1

Certification Period: 2 years

Note: Throughout the course students will learn care steps that are consistent with the International Liaison Committee on Resuscitation (ILCOR) 2015 International Consensus on Cardiopulmonary Resuscitation and Emergency Cardiovascular Care Science with Treatment Recommendations (CoSTR) and the 2015 American Heart Association Guidelines Update for Cardiopulmonary Resuscitation and Emergency Cardiovascular Care.
