CPro – CPR/AED
For Professional Rescuers and Healthcare Providers

SafeWorld and the Red Cross provide expert training that is OSHA compliant and affordable. We provide world-class instructors and award-winning courses to ensure you get training that sticks. With SafeWorld’s classroom mobility we offer you the flexibility and convenience to provide training when and where you need it.

Modular Training
CPro training is modular, providing you and your teams the flexibility to insert local protocols into your coursework so you can train the way you respond to situations and focus on your specific training needs.

Course Objectives

1. To prepare teams and individuals to recognize and respond appropriately to cardiac and breathing emergencies.

2. To teach skills that teams and individuals need to know to give immediate care to a suddenly injured or ill person until more advanced medical care can be administered.

3. To explain to teams and individuals the value of asking questions when he/she does not understand a certain aspect of the skills and knowledge training.

4. To emphasize the need for rapid medical assistance in an emergency and the importance of the role of healthcare providers and professional rescuers in the community.

Course Content

The technical content within the CPR/AED for Professional Rescuers and Healthcare Providers program reflects the most current consensus on scientific recommendations. The program content includes the
CPro – CPR/AED
For Professional Rescuers and Healthcare Providers

knowledge and skills necessary for Teams and individuals to safely identify and give appropriate care, regardless of the type of emergency. CPro courses deliver information and skills training on:

1. Scene Safety & Assessment
2. Critical Thinking and Problem Solving
3. Communication and Teamwork
4. Giving ventilations (includes BVM)
5. Choking (conscious and unconscious) and Breathing Emergencies
6. Cardiac emergencies and CPR
7. AED use and procedure

* Optional training on emergency oxygen, bloodborne pathogens, asthma inhalers and epinephrine auto-injectors also available.

Note: Throughout the course students will learn care steps that are consistent with the International Liaison Committee on Resuscitation (ILCOR) 2015 International Consensus on Cardiopulmonary Resuscitation and Emergency Cardiovascular Care Science with Treatment Recommendations (CoSTR) and the 2015 American Heart Association Guidelines Update for Cardiopulmonary Resuscitation and Emergency Cardiovascular Care.

Prerequisite
There are no prerequisites for this course.

Completion Time
5.5 Hours Classroom Course

Student/Instructor Ratio
12 to 1

Certification Period
2 years
