

ARROWHEAD PARK SEVERE WEATHER POLICY

The following will be BAGSL's official guidelines for Arrowhead Park.

The Officer In Charge (OIC) /Tournament Director (TD) on duty or the umpires on the field may suspend play due to the threat of severe weather. Arrowhead is equipped with cable television and internet service, as well as a state of the art lightning detector. The lightning detector will blast if there is lightning within 30 miles of the park. The park MUST be cleared at this time. If no more lightning is detected and it doesn't sound again, then it will give three (3) short blasts which is the "ALL CLEAR" for lightning in the area.

At the first blast of the lightning detector and/or visual sighting of lightning, the games will be suspended for a minimum of 30 minutes. The fields are to be cleared and everyone is to exit the park. This means everyone is to go to their cars. All players need to take their equipment with them. If the games are cancelled, no one will be allowed back in the park. (No one will be allowed back into the park, even to use the restroom.)

The OIC/TD will do the following:

Suspend all play and make sure the park is cleared.

We will utilize a 3 flag system to notify everyone of the status of the game.

GREEN – All clear, resume play.

YELLOW – Games are suspended due to the weather, wait in your car for a green or a red notification.

RED – Games are cancelled due to the weather.

Once the park is cleared, the OIC/TD will determine if play can resume in a timely manner by displaying the appropriate flag.
