- SLIDING PATIO DOOR
HOME POINT/NEST PACKAGES

NEST LEARNING THERMOSTAT
For years, energy-conscious consumers had little choice: They could set their thermostat to one temperature during the day and another when they came home from work. This sometimes meant returning to a house that was either too warm or too cold. The Nest Learning Thermostat not only allows you to regulate the temperature of your home from anywhere with the swipe of your finger— it also learns your preferred temperatures and intuitively adjusts to them throughout the day.

NEST CAM INDOOR
Curious about what your new puppy is up to or who is eating in the living room and dropping crumbs on the floor? The Nest Cam eliminates the mystery by enabling you to check on your home 24/7, wherever you may be. It’s like being at home without being at home.

NEST PROTECT
Is it smoke from a fire or dangerous CO from your gas furnace? The Nest Protect smoke + carbon monoxide alarm knows the difference. If a buried lunch activates the alarm, you can easily silence it from your smartphone. But in the event of an actual emergency, Nest Protect detects smoke and carbon monoxide and tells you with a clear, human-like voice and alerts your smartphone, using the Nest app.

SNAP POWER

PICO WIRELESS REMOTE WITH VISOR CLIP
Clip the Pico remote to your car’s visor to turn on multiple lights on those after-dark errands. Lutron's Pico Wireless Remote can be paired with one wireless dimmer or programmed to a group of wireless dimmers to create a “scene” to light a pathway from outside your home all the way to the kitchen.

IN-WALL DIMMER
Lutron’s in-wall dimmers bring a new dynamic to any room, allowing you to adjust the lighting from dark to dimpling and everything in between. The mood is yours to control with ease and accuracy.
