17th February 2017

Dear Parents,

In tandem with British Science Week we have planned a science week in school starting Monday 13th March 2017. The children will engage in fun science activities in the afternoons and rotate around the school to different classes. They will be working on their observational skills and making predictions. They will also be making scientific recordings of how things change over a period of time. We are going to have eggs in school leading up to this event and will be able to see how these hatch and the chicks develop.

As part of this week we are also going to have a famous inventors and scientist day on Thursday 16th March 2017 where we are encouraging the children to dress up as the invention, inventor, scientist or discovery! To enhance this we would like each child to design a poster of any size with illustrations and captions of the invention or discovery and a prize will be given to the best poster from each year group.

Yours Sincerely

Emma Henry and Chris Toner
