

## ChemEngDay UK 2017 - List of Accepted Poster Presentations

Author(s)	Title	Poster Board Number
Abbas Q.	Electrochemical Performance of Resorcinol-Formaldehyde Based Carbons /Activated Carbons as Electroactive Materials for Supercapacitor Applications	58
Abdulridha S., Garforth A. and Fan X.	Preparation of Mesoporous Y Zeolite Using Hard Templates for Catalytic Cracking of Heavy Oil	111
Abibin M. I. I. Z., Park K. H. and Angeli P.	Studies on Two-Phase Flow past Bluff Body in a Pipe	149
Aboelazayem O., Gadalla M. and Saha B.	Optimising Biodiesel Production from Waste Cooking Oil Using Supercritical Methanol	49
Ahmed T.	Optimisation of Three-Phase Separator Design: A Mathematical Design	89
Airey J.	The Tribological Performance of Gas Turbine Lubricants	140
Ajenifuja A. and Jobson M.	Novel Hybrid Adsorption-Distillation Flowsheets for the Separation of Close-Boiling Mixtures	151
Ajisehiri G., Fernández J., Hu G., Doluda V. and Rebrov E. V.	Design and Simulation of Eco-Industrial Parks Using Agent-Based Modeling Approach	54
Akpinar I. and Yazaydin O.	Adsorptive Removal of Atrazine from Water with Porous Materials	158
Al Jamri M.	Integration of Renewable Energy Sources into Petroleum Refining for Sustainable Production of Transportation Fuels	40
Aldawsari Y.	Systems Analysis of Road Transportation Decarbonisation Options	52
Alfutimie A., Arafteh A. and Aleem H.	An Investigation into the Influence of Process Variables on the Product Size Distribution in a Semibatch Reaction Crystallization Process	92
Alizadeh M., Hassanpour A., Asachi M., Ghadiri M. and Bayly A.	Numerical Investigation of the Effect of Adhesion on the Vibration-Induced Segregation of Powder Mixtures	90
Al-Janabi N.	Carbon Capture Processes: From Chemistry to Application	74
Alkailani A., Al-Duri B. and Wood J.	Hydrogenation Conversion of Furfural into 2-Methylfuran (2-MF) Using Platinum with Different Supported Catalysts	120
Almena A.	Modelling, Simulation and Economical Evaluation of Dry Food Manufacture at Different Production Scales	14
Al-Sharify Z. T., Al-Najjar S. Z. and Barigou M.	Impeller Drawdown and Dispersion of Floating Particles in Non-Newtonian Fluids	84
Alves I. P. and Reis N. M.	A New Microfluidic Test for Rapid Detection of <i>E. Coli</i> Infections	136

Ariane M., Alexiadis A. and Barigou M.	Discrete Multi-Physics Approach for Modelling Flexible Biological Valves and Solid Aggregation	79
Arkoumanis P.	Rotating Membrane Emulsification for Manufacture of Stable Pickering Emulsions	162
Asachi M.	Evaluation of Segregation of Formulated Powder Mixtures Using Near-Infrared Spectroscopy	29
Badvar M. and Barigou M.	Flow of Gas-Liquid Foams through Narrow Complex Passages	65
Bandulasena M. V., Vladislavljević G. T., Willcock H. and Benyahia B.	Production of Biocompatible Gold Nanoparticles for Drug Delivery Using Droplet Based Glass Capillary Microfluidic	67
Bidokhti N. S. and Yazaydin O.	Application of Carbonized Metal Organic Frameworks in Electrochemical Energy Storage Devices	55
Braconia M., Maestri M., Groppi G., Tronconi E., de la Fonte C. P. and Fan X.	Analysis of Multiphase Flow in Open-Cell Foams by CFD Simulations on Virtually Reconstructed Geometries	91
Cai J., Wu C. and Zhao X.	A Numerical Study of Number Concentration Distribution of Gas-Cylindrical Particles Flow Based on CFD-DEM	11
Calvo-Serrano R.	Predicting the Cradle-to-Gate Environmental Impact of Chemicals from Molecular Descriptors and Thermodynamic Properties via Mixed-Integer Programming	94
Cao H.	Kinetics of Gas Behaviour in Detergent Slurry under Pressurisation-Depressurisation Process	33
Caro M. A.	Optimization of Dilute Sulfuric Acid Saccharification of Steam Exploded Pineapple Peels for Bioethanol Production	48
Chekasov N.	Increased Deactivation Stability of ZSM-5 Zeolite in a Methanol to Gasoline Conversion via Desilication and Ca Ion Exchange	103
Chin M.	A Biomaterial-Based Platform for the Optimisation of Therapeutic Immune Cell Culture	131
Cho J.	Nature-Inspired Fractal Flow Field for PEM Fuel Cell	46
Chong J. Y., Wang B. and Li K.	Ceramic/ Stainless Steel Composite Hollow Fibre Membranes for Water	7
Choolaei M.	A Single Step Synthesis Approach for Preparing Nanocrystalline Powder of Gadolinium-Doped Ceria (GDC) for Solid-Oxide Fuel Cells	117
Collett C.	Insights into the Origin of the Catalytic Activity of Biomass-Derived Carbon	115
Crake A., Christoforidis K. C. and Petit C.	Multifunctional Porous Materials for Combined CO <sub>2</sub> Capture and Conversion	124
Darby M.	Towards the Development of Single Atom Alloy Catalysts as a Means of Escaping Linear Scaling Relations	97
de Oliveira Filho P. I.	On Ultrasonic Aerosol Generation and Transport under Uncertainty	143

Derkani M.	Understanding the Colloidal Interactions at Oil/Rock Interfaces	154
Ding P., Castro J., Bakalis S. and Zhang Z.	Foaming Non-Newtonian Viscous Liquid for Particle Coating	71
DiPaolo T. B.	The Formulation of a Suspending Vehicle	4
Dong X.	Light-Responsive IRMOF 5: Improved Ligand Synthesis and MOF Stability Study	156
Ebrahim W.	Single Droplet Drying at High Temperatures	10
Ejeh J. O., Liu S. and Papageorgiou L. G.	An Optimisation-Based Approach for Process Plant Layout	86
Ejim L. N., Yerdelen S., McGlone T., Florence A., Rielly C.D. and Nuno M.	Characterizing Liquid-Solid Plug Flows in Meso-Scale Oscillatory Flow Tubes	64
El Hebieshy J.	An Experimental Investigation of Size Induced Segregation during Die Filling	2
Espinoza C.	Emulsification of Non-Newtonian Mixtures in a High Shear Mixer	19
Esteban J., Simons T. A. H., Moxon T. E., Bakalis S. and Fryer P. J.	Uptake of a Non-Ionic Surfactant by a Tableted Compacted Powder Preparation	144
Evans A.	Investigation of the Dynamic Adsorption of CO Using Metal-Organic Frameworks	148
Farshchi A, Hassanpour A, Caragay J. and Bayly A.	Characterization of Spray-Dried Detergent Powders	30
Fernández-Castané A.	Bioprocessing Biologically Synthesised Magnetic Nanoparticles: Production, Recovery and Purification of Magnetosomes	126
Gadkari S.	Microwave Assisted Thermocatalytic Decomposition of Methane: Numerical Analysis	107
Garay A. G.	Economic and Environmental Assessment in the Production of Propylene Glycol from Biodiesel Glycerol Under Uncertainty	16
Garcia M.	Representation of Vapour-Liquid-Equilibria and Densities of Unloaded and Loaded DEEA Solutions: eNRTL Model	119
Garcia-Trinanes P., Berry R. J. and Bradley M. S. A.	Virtual Formulation Laboratory for Prediction and Optimisation of Manufacturability of Advanced Solids Based Formulations	164
Garcia-Trinanes P., Zigan S., Coutroubis A. and Brown D.	Chemical Engineering in the UK – A New Paradigm	169
Glasse J. and Ostrowski B.	Active Learning in Chemical Engineering Education in the Context of Large Student Cohorts.	170
Gollakota A. R. K.	CFD Approach for Developing Next Generation Bio fuels through Catalytic Upgrading Procedure	108
Gouseti O.	Freeze-Drying of Concentrated Sucrose Solutions	21
Gray A.	Quantification of Deposition of Perfume Capsules on Fabrics in	9

	a Washing Machine	
Green M.	Moving Plastics into the Circular Economy by Chemical Engineering	22
Green M., Griffiths A., Seville J.P.K., Thorpe R. and Leeke G.	Fuel from Waste Plastic - Towards a Circular Economy for Plastics	26
Gu L. and Mavituna F.	Exploitation of Interspecies Interactions for Pharmaceutical Production	137
Guharoy U.	DFT Study of Dry (CO <sub>2</sub> ) Reforming of Methane over Tin-Doped Ni (111)	98
Hallac F., Fragkopoulos I. S., Conell S. D. and Muller F. L.	Micro-Mechanical Properties of Organic Crystals	72
Hart A.	Thai-CAPRI Heavy Oil Recovery Process: Past, Present and Future	56
He L., Xing L., Zhuo B., Castro J., Bakalis S. and Zhang Z.	Soft Particle Coating with Salt in a Fluidised Bed Coater	35
Heslop M.	New Dimension in Presenting Assignments - Making Clear the Compiler's Perspective	165
Houghton A.	Non-Ambient Powder X-Ray Diffraction of Metal-Organic Framework Crystals	83
Hu G., Fernández J., Doluda V. and Rebrov E. V.	Design of a Microstructured Reactor/Heat-Exchanger for a Single Step Methanol-to-Hydrocarbon Process over a ZSM-5 Zeolite	53
Hussain M., Cayre O. J. and Bayly A. E.	Engineering Washing Powder from Ternary Anionic Surfactant/Polycarboxylate Based Polymer/Water Systems	23
Ibrahim D., Jobson M., Li J. and Guillén-Gosálbez G.	Design of Flexible Heat-Integrated Crude Oil Distillation Units	155
Jäger N., Apfelbacher A., Daschner R. and Hornung A.	Storable Energy Carriers beyond the Electricity Market: Thermo-Catalytic Reforming (TCR <sup>®</sup> ) to Contribute to the Present Energy Challenges	44
Johnson E.	Greening Britain's Gas: Supplying Homes with Biomethane and Hydrogen via the Gas Grid	39
Joseph S.	Manufacture and Characterisation of Protein Nanoparticles as Surrogate Virus Mimics for the Optimisation of Chromatography Media	135
Kalargaris I.	An Experimental Investigation of the Effects of Fueling a Di Diesel Engine with Plastic Pyrolysis Oil	43
Kapil N., Nigra M. M. and Coppens M.	Gold-Based Catalyst with Locally Controlled Chemical and Geometric Environments to Tune Catalytic Performance	121
Karampalis D.	Dissolution Phenomena of Spray Dried Powders by Single Particle Approach	8
Kararantanos A. and Cai Q.	Understanding the Electrode-Electrolyte Interactions in Energy Storage Batteries Using Molecular Simulations	57

Ker H. J, Bieber N., Wang X. and Shah N.	Sustainable Planning of Energy-Water-Food Nexus Using Decision Making Tools	50
Kings I.	Kinetic Modelling of Hydrodeoxygenation Routes of Paramethylguaical on Rh/SiO <sub>2</sub>	69
Kontziampasis D., Manga M. S., Castro J. and York D.	Coating Particles Using High Viscous Fluids and Foams with Non-Ideal Mixers	34
Ledezma-Martínez M., Jobson M. and Smith R.	A New Design Approach for Crude Oil Distillation Systems with Pre-Separation Units	78
Li C.	Flow Synthesis of Zn/Cr-Oxide Based Catalysts Allowing Hydrogen Sulphide Sulfide Insensitive Methanol Synthesis	95
Li Y.	Engineering Nano-Assemblies of Inorganic Particles	24
Liamas E., Black R., Mulheran P., Thomas O. and Zhang Z. J.	A Multiscale Study on the Effect of Surface Chemistry on Protein Adsorption	139
Limleamthong P.	Multi-Criteria Screening of Chemicals Considering Thermodynamic and Life Cycle Assessment Metrics via Data Envelopment Analysis: Application to CO <sub>2</sub>	114
Lomeli M.	Process Simulation and Multiobjective Optimisation of the Production of Biomass-Derived Renewable Polyesters	12
Losson Iosson C.	Characterising Chocolate Paste and the Impact on Downstream Processes	15
Loyola-Fuentes J.	Fouling Modelling in Crude Oil Preheat Systems	75
Lynch M.	Chaperonin-Inspired Enzyme Immobilisation on Mesoporous Silica SBA-15	163
Mackri D.	Titania Powders in the SLS Process	82
Mahdi F.	Effect of Operational Parameters of Colloid Mill on Calcium Carbonate and Cellulose Suspensions	85
Manning J.	The Application of Green Chemistry to Enable Sustainable Manufacture of Bioinspired Nanosilica	100
Mardle P.	A Study in the Scalable Fabrication of NiPt Nanowires for PEMFC Applications	61
Matos R. L.	Supercritical Precipitation and Coating of Curcumin on Lactos Surface for Pulmonary Delivery	6
Mavrou P.	Predicting Moisture Migration in Composite Food Systems during Storage	87
Maxfield L.	Prediction of Self-Heating in Spray Dryer Wall Build-Up of Detergent Powder	25
McDonough J.	A Study of the Flow Structures Generated by Oscillating Flows in a Helically Baffled Tube	63
McDonough J.	Applications of 3D Printed Fluidic Oscillators to Process Intensification	73
Menga Z. and Coppensa M. O.	Preparation and Characterizations of Hybrid Mesoporous Silica Membrane on Polymer Substrates	37
Migliozzi S.	Experimental and Computational Fluid Dynamic Studies of Continuous Mixing of Highly-Viscous Non-Newtonian Mixtures	80

Moore-Kelly C.	Automated Micro-Volume Capillary Circular Dichroism and Fluorescence Spectroscopy for Rapid Analysis of Protein Conformation	128
Mulakhudair A.	Fermentation Integrated with In Situ Separation of Bio-Products Using Microbubble Technology	125
Mushtaq Q., . and Tokay B.	Metal Organic Framework Membranes for Natural Gas Purification	42
Nair P. K. and Rahmanian N.	Impact of Impurities on Formation of Carbon-Dioxide Hydrates	60
Nazki A. A.	From Basic Enzymatic Building Blocks to Bacterial Signalling Pathways: A Systematic Elucidation of Spatial Regulation and Compartmentalization of Biochemical pathways	134
Nimmakayla N. S.	Electronic Study of TB Causing Bacterial DNA Making Nucleotide Synthesis	138
Nirmalkar N. and Barigou M.	Generation of Bulk Nanobubbles in the Presence of Salts or Surfactants	145
Nuguyen T.	Modelling the Drying Behaviour of Polymeric Droplets at High Temperature	70
Okeyo C., Mallet F., Rahmanian N. and Schäfer F.	Simple Lab Set-Up for Agitated Filter Drying of Active Pharmaceutical Ingredients	18
Omojola T.	Effect of Si/Al Ratios and Mass Transfer during the Adsorption, Desorption and Activity of Methanol and DME Over ZSM-5 Catalysts	102
Onoja O.	The Oxidative Coupling of Methane: Application of Membrane Reactor to Enhance the Yield of Higher Hydrocarbons	122
Onyenkeadi V. N.	Greener Synthesis of Styrene Carbonate from CO <sub>2</sub> Using Heterogeneous Catalyst	104
Ou X, Garforth A. A. and Fan X.	Optimization of Fe-ZSM-5 Coatings on SiC Cellular Foams for Phenol Wastewater Treatment	96
Ozcan A. and Yazaydin	Realistic Membrane Simulations for Nanoporous Materials	146
Ozturk B.	Deterpenation of Folded Citrus Essential Oils Using Bio-Solvents	106
Park K. H., Voulgaropoulos V., Chinaud M. and Angeli P.	Laser Imaging in Liquid-Liquid Flows	160
Paulillo A.	Life Cycle Assessment of Reprocessing of Spent Nuclear Fuel in the UK	47
Peletiri S. P., Rahmanian N. and Mujtaba I. M.	Effect of Impurities on Rich CO <sub>2</sub> Fluids in Pipelines	27
Petsagkourakis P.	IQC Analysis of Constrained Model Predictive Control of Large-Scale Systems	150
Pineda M.	Statistical Mechanics Modelling and Coarse-Grained Description of NO Oxidation on Pt(111)	77

Pollock M. and Sorensen E.	Effectively Conveying the Importance and Relevance of Safety to Undergraduates while Educating Them in Good Practices	166
Principe I.	Development of Nitrogen Doped Resorcinol-Formaldehyde Gels for Carbon Capture	142
Rakovitis N., Li J. and Zhang N.	A Novel Approach for Scheduling of Operations in a Large-Scale Scientific Services Facility	161
Rasheed A.	Prediction of the Steady State Performance of Sequencing Batch Reactors from Batch Kinetic Tests	129
Roettger K., Smith A., Taylor M., Carrol J., Threlfall-Holmes P. and Bakalis S.	Prospect Liquid Scale up Facility for Process Development and Metrological Studies	38
Rogers T.	A Complimentary CPD Program for Involving PhD Students as Partners for UG Learning	167
Romano M., Brunazzi E., Simmons M. and Alberini F.	Toward Online Rheology Measurements in Stirred Vessels	62
Routoula E. and Patwardhan S. V.	Peroxidase Immobilisation on Bio-Inspired Silicas for Dye Degradation	110
Sebastia-Saez D.	CFD Study of the Liquid-Gas Interface in Structured Packings	147
Sebastine I., Ahmad R., Jackson T., White A. and Smith D.	Optimisation of Particulates Processing, Packaging and Filling in a Pilot Scale Facility	28
Shier A.	Breakage of Needle-Like Crystals under Pressure Filtration	88
Silvarrey L. D.	Non-Thermal Plasma Assisted Pyrolysis of Waste High Density Polyethylene for Monomer Recovery	13
Simionesie D.	Model Asphaltene Aggregation	76
Simons T. A. H., Esteban J., Bakalis S., Zhang Z., Duckitt C. and Tantawy H.	Micromanipulation Experiments to Study Adhesive Forces between Model Detergent Particles	31
Simou K.	Nanomechanics of Articular Cartilage and Synovial Fluid	153
Soori U., Yuen P.W.T., Selvagumar S., Zahidi U., James D. and Richard M.	Chemical Sensing of Washing Powder by Multispectral Imaging	32
Stamatiou I.	Determination of Mass Transfer Resistances of Fast Reactions in Three-Phase Mechanically Agitated Reactors	113
Su X.	Electrodeposition of Cu from Deep Eutectic Solvents by Using Pulse Current	17
Sun L. and Jia Z.	Simulation of Industrial Scale Super Open Rack Vaporizer	93
Svensson M.	The Effect of Novel Binders on the Performance of Capacitive Deionization for Water Purification	141
Svoboda V.	Continuous Co-Crystallization of Benzoic Acid and Isonicotinamide by Mixing-Induced Supersaturation: Exploring Opportunities Between Reactive and Antisolvent	1

	Crystallisation Concepts	
Tam B. and Yazaydin O.	Design of Electric Field Controlled Molecular Gates Hosted in Metal-Organic Frameworks	157
Totti S.	A Promising Highly Porous 3D Scaffolding System for <i>in vitro</i> Pancreatic Tumour Development and Drug Screening	133
Tsocharidou S.	Understanding the Mechanism of CO <sub>2</sub> Transport through Dual-Phase Membranes	81
Turchi M.	In Silico Modelling of Complex Drug Formulations	66
Turganly R.	Pt/Cu Single Atom Alloy Catalyst for Coke Free Methane Activation	101
Vakili R., Gorgojo-Alonso P., Holmes S. M. and Fan X.	Microwave Assisted Synthesis of Zirconium-Based Metal Organic Frameworks: Optimisation and Gas Adsorption	112
Valverde Armas P. E.	Effect of Water on Cu Electrodeposition from Ethaline Based Deep Eutectic Solvent	116
Vangala S. P. K.	Computational Insights into Structure-Property Relations in Co-Doped TiO <sub>2</sub> Using DFT	118
Venezia B., Constantinou A., Wu G. and Gavriilidis A.	Aerobic Oxidation of Benzyl Alcohol in a Catalytic Membrane Reactor: Experiments and Modelling	123
Vollans A.	The Bradford Process: A New Novel Titanium Production Method - Development and Optimization	20
Waldron C.	Multistep Synthesis of Benzylacetone in Micropacked Bed Reactors	99
Wan Mahmood M. A, Theodoropoulos C. and Gonzalez-Miquel M. Mahmood W. M. A, Theodoropoulos C. and Gonzalez-Miquel M.	Lipid Extraction from Microalgal Biomass Using Bio-Based Solvents	132
Wang H.	Rational Encapsulation of Needle-Shaped Nanocrystals into Zein@Au Hybrids for Controlled Release and Active Targeting Delivery	127
Wongsirichot P.	Rapeseed Meal Pretreatment for Improved Biopolymer Production	105
Wright A.	The Development of a DBD Plasma, Microbubble Enhanced Waste Treatment Reactor	51
Wu A.	Application of Robust Model Identification Techniques in the Activated Sludge Process	130
Wu K.	Pattern Formation in Pulsed Gas-Solid Fluidized Beds: Insights from Experiments and Computations	68
Xiang H., Siperstein F., Gorgojo P. and Fan X.	Metal-organic frameworks (MOFs) for Alkene/Alkane Separation	109
Yu Q.	Thermo-Mechanical Analysis of Microcapsule Containing Phase Change Material (PCM) for Cold Storage	45
Zhang D.	Lattice Boltzmann Simulation of Liquid-Gas Two-Phase Flow	41

	and Oxygen Diffusion in Polymer-Electrolyte Membrane	
Zhang J. and Wu C. Y.	The Effect of Water Content on Mechanical Properties of Microcrystalline Cellulose and Mannitol Powders	3
Zhang X., Hu J.F. and Zhang Z.	Preparation and Characterisation of Antifouling and Antiseptic Microcapsules	5
Zhao K.	Three-Dimensional Modelling of Thin Liquid Films over Spinning Disks	159
Zhuo B., Xing L., He L., Zhang Z., Bakalis S. and Castro J.	Improvement in Flowability of Soft Particles with Coating	36
Zigan S.	Controlling Process Parameters during the Wood Pellet Production Process to Minimise Pellet Breakage and the Risk of Dust Explosions	59
Zigan S.	Enhancing the Student Learning Experience in Chemical Engineering by Employing a Virtual Laboratory	168
Zympeloudi D.	Investigating Soil Removal Mechanisms to Minimize Water Usage during Domestic Wash Processes	152

<b>Theme</b>	<b>Poster Board Number</b>
Product Engineering	1-38
Energy Generation, Storage and Utilisation	39-61
Chemical Engineering Fundamentals	62-93
Catalysis and Sustainable Green Chemistry	94-124
Biological Engineering	125-139
Chemical Engineering at Interface	140-164
Education/Training	165-170
