

READING YOUR CHART

When looking at your chart, realize that this is a “snapshot” of what the sky looked like from the perspective of where you were on earth, at that exact moment you were born. The wheel shows the different planets and the signs they are transiting through. Imagine that the planet shows the “what” while the sign shows “how.” The wheel is also broken up into 12 houses that show “where” these transits happen in your life.

SIGNS
