DIGITAL THERMOMETER

FEATURES

1. Easy to read digital LCD display.(large display)
2. Durable, stainless steel 15cm probe, high resolution temperature accuracy
3. Temperature can be taken under an arm, ear, or under the tongue (oral use) it is suggested that oral temperature be taken in infants only after surgery or treatment
4. Very sensitive device, quick to operate
5. DC thermometer is recommended, it will automatically shut off after 3 minutes
6. Small, lightweight, convenient for use and transport. The display of 150 will change to show the real measured temperature. This feature is displayed as long as the button is pressed.
7. The battery indicator shows the battery power, when the symbol "C" appears, the battery needs to be replaced.

PRECAUTIONS

1. Do not drop the probe. Instead, clean the unit with a dry cloth and dust the probe with rubbing alcohol.
2. Do not drop the thermometer or expose it to heavy shock. The unit is not shockproof.
3. Do not bend or twist the probe. This can cause failure of the thermometer.
4. Do not use any sharp objects on the thermometer. Performance may be impaired.
5. Stop using the thermometer if it operates abnormally or the display is not clear.
7. Clean the thermometer probe before using.
8. Do not attempt to disassemble the unit except to replace the battery.
9. After prolonged use, the thermometer may become warm. This is normal. Allow the thermometer to warm to room temperature before use.
10. The thermometer should be stored in a cool, dry place. Do not store with solvents or other chemicals.

BATTERY REPLACEMENT

1. When the symbol "C" appears, the battery needs to be replaced.
2. Push the battery cover off in the direction of the arrow.
3. Insert new batteries using any standard alkaline batteries in the operation.
4. Clean the battery contacts and also those of the device prior to battery installation.

HOW TO USE

1. Activate the probe with rubbing alcohol before use.
2. Press the small button, the display will read "32°C to 42°C".
3. Remove the power switch and the display will show "0°C to 100°F".
4. Press the probe in the appropriate portion (oral, axillary, or rectal).
5. Insert the probe into the mouth (oral), under the arm (axillary), or into the rectum (rectal).
6. The "T" symbol will replace the temperature reading. The temperature will not be shown if the probe is not in the correct position.
7. The "T" symbol will disappear after 60 minutes. To stop the temperature from being displayed, press the button again.
8. The symbol "C" will appear on the display if the battery is low.

RELIGIOUS MEASURE TO MEASURE TEMPERATURE

THE TAKING OF BODY TEMPERATURE: Change in body temperature is one of the most important indications of illness. It is expected that the temperature will be taken in infants only after surgery or treatment.

BODY TEMPERATURE: A person's body temperature will vary several degrees to one full degree lower in the morning than it is at the other end of the day. Therefore, if you feel a temperature of 99°F (37°C) in the morning, it will be 99.6°F (37°C) or more in the late afternoon and may be lower in the morning. In determining your normal body temperature, you should take your temperature both in the early morning and in the late afternoon over several days. Children have the same normal temperature range as adults. A fever for children is usually defined as a temperature of 100°F (37.8°C) or higher. Excessive sweating, fatigue, high blood pressure, and sleep disturbances are symptoms of fever in children. You should consult a doctor if your child has a fever.

PRECAUTIONS TO OBSCURE THE TAKE-OVER BY POSSIBLE CAUSES: Do not take your temperature in the following situation: 1) After having a warm bath or shower. 2) After exerting physical activity. 3) After eating a meal. 4) After exercising. 5) After drinking alcohol. 6) After smoking.

CLEANING INSTRUCTIONS

To clean the thermometer, wash it with a solution of mild detergent and cold water. Remove the probe from the unit before cleaning. The probe can be disinfected using any standard disinfectant. Thoroughly wash and dry the probe and cover the after use. Never use abrasive detergents as they may damage the probe.

LIMITED WARRANTY

This thermometer is warranted for one year from the date of purchase against manufacture's defect under normal household use. The warranty does not cover damage due to improper use or abuse, and is void if the product is not returned to the manufacturer's facility or to an authorized retailer. The warranty is valid only if the product is returned to the manufacturer's facility or to an authorized retailer within the warranty period.

FOR CE MARKING

This product is in compliance with the Low Voltage Directive 2014/35/EC and the Electromagnetic Compatibility Directive 2014/30/EC. This product has been designed and tested to meet the requirements of EN 55011:2014 for the following limits: 1) Device is not required to have a factory output power limit when the product is used within EU. 2) Device is not required to have a factory output power limit when the product is used within the UK.

FCC STATEMENT

NOTICE: PROHIBITED FOR RADIO TELEVISION INTERFERENCE (for U.S.A. Only)

Operation is subject to the following two conditions: 1) This device may not cause harmful interference, and 2) This device must accept any interference received, including interference that may cause undesired operation.

Thank you for purchasing an INNOVATIONS product.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.
