**HOW TO USE**

**Special Features:**
- **Non-Contact Temperature:** An alarm will sound when the peak temperature has registered and is ready to be read. The **Non-Contact Temperature** alarm (only quick beeps followed by a pause) will sound repeatedly for approximately 8 seconds before turning off. The display of 18.8 °C will change to show the last measured temperature. This display is displayed by pressing the battery cover. When the button is released, the thermometer will revert to "Ready mode" and the accumulated temperature will be displayed.
- **Memory Function:** The thermometer memory function will be displayed by pressing the memory button for approximately 8 seconds when the temperature is higher than 18.8 °C. The temperature will decrease by 0.5 °C/second until the temperature falls to 18.8 °C.

**Particulars:**
- **Display Temperature:** The thermometer display will show the current temperature.
- **Battery Indicator:** When the battery is low, the battery indicator will display "Low Battery".
- **Auto Power Off:** The thermometer will automatically turn off after 30 seconds.
- **Memory Function:** The thermometer will store the last measured temperature.
- **Low Battery Alarm:** When the battery is low, the display will show "Low Battery".

**RELIABLE MEASUREMENTS TO MEASURE TEMPERATURE:**
**The Taking of Body Temperatures:**
- **Body Temperature:** A person's body temperature will usually be several hundredths of a degree lower than the surrounding air temperature.
- **Rectal Temperature:** The rectal temperature is the most accurate measurement of body temperature. Before taking the rectal temperature, make sure the thermometer is calibrated. Exercise, stressful conditions, or the use of a water bottle can affect the rectal temperature.
- **Axillary Temperature:** The axillary temperature is taken by placing the thermometer in the armpit. The axillary temperature is less accurate than the rectal temperature.
- **Tongue Temperature:** The tongue temperature is taken by placing the thermometer in the mouth. The tongue temperature is slightly lower than the axillary temperature.

**CLEANING INSTRUCTIONS:**
To clean the thermometer, wash with a solution of mild detergent and cool water. Disconnect the thermometer by wiping the sensor with a soft cloth dampened with a solution of warm water and mild detergent. Do not immerse the thermometer in water.

**LIMITED WARRANTY:**
This product is guaranteed for one year from the date of purchase against defects in materials or workmanship. In the event of a defect, the product will be repaired or replaced at the manufacturer's option. The manufacturer's liability under this warranty shall be limited to the repair or replacement of the product. This warranty does not cover damage caused by misuse, accident, or alteration of the product. The manufacturer shall not be liable for any incidental or consequential damages. The warranty is non-transferable.

**FCC COMPLIANCE:**
NOTE: This equipment complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: 1) this device may not cause harmful interference, and 2) this device must accept any interference received, including interference that may cause undesired operation. This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. Any changes or modifications to the product not approved by the manufacturer shall void the warranty.
