FAST READ DIGITAL CLINICAL THERMOMETER

INSTRUCTIONS FOR USE
Please read carefully before using.

FEATURES
1. Fast on-off switch, temperature measurement in about 8 seconds with proper use.
2. Memory displays for the last temperature.
3. Excellent recall, can read after power off.
4. Easy to read digital LCD display.
5. Contrast, accuracy and sensitivity of the display are retained after long periods of non-use.

PARTS DESCRIPTION
- Display Window
- ON/OFF Button
- Sensor

SPECIFICATIONS
- Range: 95°F to 109°F (35°C to 42.8°C)
- Accuracy: ±0.3°F (±0.2°C)
- Resolution: 0.1°F (0.1°C)
- LCD display: Yes
- Power source: 2 x AAA batteries

PRECAUTIONS
1. For best results, do not use the fast read thermometer for axillary (underarm) measurements. Use for oral and rectal temperatures.
2. Do not use on the probe. Instead, immerse the unit with a dry cloth and disinfect the probe with isopropyl (rubbing) alcohol.
3. Do not drop the thermometer or expose to heavy shock. The unit is not shock-proof.
4. Do not bend or hit the probe.
5. Do not store the unit in direct sunlight, or in a high temperature, or in high humidity or dust.
6. Do not use the thermometer if it operates erratically or if display functions.
8. Clean the thermometer probe before storing.
9. Do not attempt to disassemble the unit to replace the battery.
10. If this thermometer has been stored at low-temperature, let the thermometer warm to normal room temperature before use.
11. Performance may be affected if stored or operated below outside stated temperatures and humidity ranges or the patient’s temperature is below the ambient (room) temperature.

BATTERY REPLACEMENT
1. When the symbol “C” appears, the battery needs to be replaced.
2. Using a coin, insert the coin into the coin slot and remove the metal-coin.
3. Insert new battery into the coin slot.
4. When using the coin, remove the coin to avoid battery cover locking.

HOW TO USE
1. Disinfect the probe with isopropyl (rubbing) alcohol before using.
2. Press the ON/OFF button. The display will read “---.”
3. Release the power switch and the display will show “1°F (3°C) at F1C” (F1C) flashing.
4. Place the probe in the appropriate position (oral, axillary or rectal) in the patient.
5. Once the degree sign “C” on the display stops flashing, the temperature is displayed.
6. The unit will automatically turn off in 3 minutes (approx.), however, if probing battery life, it is recommended to turn off the thermometer by pressing the ON/OFF button once the temperature has been read.

RELIEF METHODS TO MEASURE TEMPERATURE
The taking of body temperatures is one of the most important instruments of diagnosis. It is important that accurate temperatures be taken. Even the slightest deviation from the normal body temperature is an important indicator. The instructions that follow will clearly and succinctly outline the procedure to follow to determine accurately a fever.

BODY TEMPERATURE: A person’s body temperature will usually be slightly lower in one full degree lower in the morning than it is in the late afternoon. Therefore, if your temperature is 98.6°F (37°C) in the morning, it could be 98.4°F (37.0°C) in the evening. Exercising, excessive clothing, hot bath, hot weather, warm food and drink can cause minor elevations of up to 0.6°F (0.3°C) in a single day. Therefore, these to cause a lower temperature, are to be expected.

RECTAL USE: If rectal temperature is recommended by your doctor you may use a probe shield. Insert thermometer into the probe shield. Lubricate the probe cover with a water soluble jelly for easier insertion. Do not use petroleum jelly as this will hinder the heat transfer from the rectum. STOP if any resistance is felt. The unit is on the way to the probe and there is no need to insert the probe deep into the rectum. The inserted depth in the red light is around 1.0 cm to 2.0 cm (5.0 cm to 12.0 cm) longer than oral temperature.

CLEANING INSTRUCTIONS
Clean the thermometer, wash it with a soap and rinse with hot water. Do not immerse the thermometer in water, because the limiter is not watertight. Do not use alcohol or any other cleaning agent.

LIMITED WARRANTY
This thermometer is guaranteed for one year from the date of purchase against manufacturers neglect under normal household use. Follow the instructions carefully, and all parts will be repairable for one year from the purchase date. The thermometer does not function properly, please bring it to our store or call our service at 1-877-245-9690. Our representative will provide further instructions on how to correct the problem or to return it for repair or replacement.

NOTE
This device may not cause harmful interference, and 2) this device must accept any interference received, including interference that may cause undesired operation.

POSSIBLE POTENTIAL FOR RADAR/TELEVISION INTERFERENCE (for U.S.A. Only)
Operation is subject to the following conditions: 1) this device may not cause harmful interference, and 2) this device must accept any interference received, including interference that may cause undesired operation.

This product has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this product does cause harmful interference to radio or television reception, which can be determined by turning the product on and off, the user is encouraged to correct the interference by one or more of the following measures:

1) Reorient or relocate the receiving antenna
2) Increase the separation between the equipment and receiver
3) Consult the dealer or an experienced radio/TV technician for help.

Changes or modifications not expressly approved by the party responsible for compliance could void the user’s authority to operate the equipment.
