FAST READ DIGITAL CLINICAL THERMOMETER

INSTRUCTIONS FOR USE

Please read carefully before using.

FEATURES
1. Fast oral and rectal temperature measurement in around 10 to 20 seconds with proper use.
2. Memory for the latest temperature reading.
3. Very sensitive device, quick to obtain results.
4. Easy to read digital LCD display.
5. Compact, accurate and durable; LI1 large scale integrator unit.
6. If this thermomter is not working properly, please contact the nearest branch.
7. If the battery is exhausted, it will automatically shut off in about 30 seconds.
8. Small, lightweight unit, easy to use for both adults and children.
9. ABS resin body prevents no hazard compared to broken mercury glass thermometers.
10. Low battery indicator shows the symbol " " appears, the battery needs to be replaced, and the test is not water resistant.

PRODUCT CLASSIFICATION

Type: BF 1P equipment

HOW TO USE

1. Remove the tip of the probe from the storage bag, and insert the tip into the patient’s mouth.
2. Align the tip to the front and back edges of the head and then press the ON/OFF button.
3. The display will then show " " if there is no signal, or " " if there is a signal with a fever.
4. The measurement time is from 6 to 8 seconds.
5. Stop pressing the button after 8 seconds, and then check the temperature.
6. The battery needs to be replaced if the symbol " " appears.

RELIEFABLE METHODS TO MEASURE THE TEMPERATURE OF THE BODY

The body temperature of a person's body changes in one of the most important indicators of illness. If it is important that accurate temperature be taken. Even though the digital thermometer is used in similar manner to the glass thermometer, it is important that the simple instructions for use of this thermometer be followed closely and that the person taking the temperature understands body temperature.

BODY TEMPERATURE: A person's body temperature usually will be determined to one full degree higher in the morning than it is at the time afternoon. Therefore, to determine your temperature, you should take it after the neck and arm are normal temperatures. A person's body temperature is 37°C (98.6°F) in the morning, 36.6°C (98°F) in the afternoon, and 37°C (98.6°F) in the late afternoon and evening. Children have the same normal temperature as adults, 36.8°C (98.6°F) in the morning and 37°C (98.6°F) in the afternoon.

BATTERY REPLACEMENT

1. When the symbol " " appears, the battery needs to be replaced.
2. When using the battery, make sure it is of the right type, and then remove the battery from the battery holder.
3. Replace the battery with the same type.

PRECAUTIONS

1. Do not store the probe. Instead, clean it with a damp cloth and do not clean the probe with liquid detergent, alcohol, or any other cleaning agent.
2. Do not drop the thermomter or expose it to heavy impact. The unit is not im pact-proof.
3. Do not bend the probe.
4. Do not store the probe in direct sunlight, at a high temperature, or in humid environment.
5. Do not use the thermometer if it is not working properly.
6. Do not keep out of reach of children.
7. Clean the thermometer before storage.

LIMITED WARRANTY

This thermometer is guaranteed for one year from the date of purchase against manufacture’s defect under normal household use. Following the directions closely will ensure years of dependable operation.

FCC STATEMENT

NOTE:
1. POTENTIAL FOR RADIO TELEVISION INTERFERENCE (for U.S.A. Only)
   Operation is subject to the following two conditions: 1) This device may not cause harmful interference, and 2) this device must accept any interference received, including interference that may cause undesired operation.
   This product has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. The product generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this product does cause harmful interference to radio or television reception, which can be determined by turning the product on and off, the user is encouraged to try to correct the interference by one of the following means.
   a) Reorient or relocate the receiving antenna.
   b) Increase the separation between the product and the receiver.
   c) Connect the device to an outlet on a circuit different from that to which the receiver is connected.
   d) Consult the dealer or an experienced radio/TV technician for help.
   Changes or modifications not expressly approved by the party responsible for compliance could void the user’s authority to operate the equipment.
