NOTE: This Base is specifically calibrated to be used with the Probes that came with it and should not be intermixed with other units.

FEATURES
1. Fast oral and rectal temperature measurement in around 10 seconds with proper use.
2. ThermoTrend helps you better understand your health by showing the trend of last 3 temperatures measured.
3. Memory displays for the last temperature taken.
4. Easy to read displays.
5. Compact, accurate and durable LSI (large scale integration) unit.
6. Temperature can be taken orally or rectally.
7. If the thermometer is inactively left on after temperature stabilization, it will automatically shut off after about 30 minutes.
8. Small, light weight unit. Universal use for the whole family, especially ideal for children.
9. ABS resin body presents no hazard compared to broken mercury in glass thermometers.
10. Low battery indicator: when the symbol "CA" appears, the battery needs to be replaced.

SPECIFICATIONS
Range: 89.6–111.0°F (33.0–43.8°C)
Below 89.6°F (32°C) displays L°F (L°C).
Resolution: 0.1°F (0.1°C)
Accuracy:
± 0.2°F (± 0.1°C) between 98.0°F (37.0°C) and 99.0°F (37.5°C).
± 0.3°F (± 0.2°C) between 96.0°F (35.0°C) and 98.0°F (37.0°C).
± 0.5°F (± 0.3°C) less than 96.0°F (35.0°C). Accuracy is ± 0.6°F (± 0.3°C) greater than 106.0°F (41.0°C).
Battery: CR2032 (3V) (included)
Power Consumption: 0.40 milliwatts in measurement mode
Battery Life: More than 169 hours of continuous operation
Dimensions: 114 X 31 X 17 mm (Main body with Rectal probe)
Weight: Approx. 23 grams including battery

PRECAUTION
1. Do not boil the probe or subject it to extremely hot water. Instead, clean and disinfect the probe by wiping it with a soft cloth slightly dampened with rubbing alcohol.
2. Do not drop the thermometer or expose to heavy shock. The unit is not shockproof.
3. Do not bite the probe.
4. Do not store the unit in direct sunlight, or where there may be high temperatures, high humidity or excessive dust. Performance may be degraded.
5. Do not store the battery in the unit or leave it in contact with the battery holder for an extended period of time. The battery may be damaged in this manner.
6. Memory displays for the last temperature taken.
7. If the battery is drained or the battery needs to be replaced, the result will continue flashing until the thermometer is powered off.

RELEAVABLE METHODS TO MEASURE TEMPERATURE
1. The taking of body temperatures: Change in body temperature is one of the most important indicators of illness. Therefore, it is important that accurate temperatures be taken. Even though the human body is a living, fluid manner to the glass thermometer. It is important that the simple instructions for use of this thermometer be followed closely and that the person taking the temperature understands body temperature.

BODY TEMPERATURE: A person's body temperature will usually be several tenths to one full degree lower in the morning than in it is at noon. Therefore, if your temperature is 100.6°F (38.0°C) at 6:00 a.m. or in the late afternoon it should be regarded as normal.

To determine what your normal body temperature is, you should take your temperature over several days in a row. For the first few days, take the temperature at the same time each day. After that, take it at the same time each day. Children usually have the same normal temperature range as adults. A fever for both children and adults is typically defined as a temperature over 100.4°F (37.9°C) (oral reading). Exercise, excessive clothing, hot bath, hot water, hot food and drink can cause mild elevations of up to 100°F (38°C) without being feverish.

RECTAL USE: If rectal thermometer is recommended by your doctor, you may use a probe cover. Insert thermometer into the probe cover and lubricate with a water soluble jelly for easy insertion. Do not use petroleum jelly. Insert tip of probe no more than 1/2 inch into the rectum. STOP if you meet any resistance. If the tip of the probe so there is no need to insert it deep into the rectum. In general, the rectal temperature is around -1.0°F (5°C) higher than oral temperature.

CLEANING INSTRUCTIONS
To clean the thermometer, wash the tip with a solution of mild detergent and warm water. Disinfect the thermometer and the probe by wiping the metal with a cloth dampened with alcohol in a hospital antiseptic solution such as rubbing alcohol.

FCC Statement
NOTICE: POTENTIAL FOR RADIOINTERFERENCE INTERFERENCE (for U.S.A. Only)

Other manufacturers: 1. This device has been tested and found to comply with the limits of a Class B digital device, pursuant to part 15 of the FCC rules.
2. This Class B digital apparatus, in the interference-causing equipment standard entitled "Digital Apparatus" ICES-003; CAN/CSA-CEI/IEC 601-1, when connected interface to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this device causes harmful interference to stereo or television reception, which can be determined by turning the product on and off, the user is encouraged to try to correct the interference by one of the following means:
3. Reorient or relocate the receiving antenna
4. Increase the separation between the equipment and the receiver
5. Connect the product into an outlet on a circuit different from that to which the receiver is connected

LIMITED WARRANTY
This thermometer (battery excluded) is guaranteed for one year from the date of purchase against manufacturer’s defect under normal, household use and without evidence of tampering.

WARRANTY EXCLUSIONS
1. This device shows any signs of tampering or attempted modification.
2. This device shows signs of tampering, including, but not limited to: physical damage, liquid or other damage.
3. Damage caused by natural disasters (fire, flood, earthquake, lightning).
4. No receipt or proof of purchase showing date of purchase.

Thank you for purchasing a 180 INNOVATIONS product.
