DIGITAL CLINICAL THERMOMETER

INSTRUCTIONS FOR USE
Please read carefully before using

FEATURES
1. Easy to read digital LCD (liquid crystal display).
2. Compact, accurate and durable (large scale integration) device.
3. Thermometer can be taken under the tongue (oral use) or under the arm (axillary use). It is suggested that rectal temperatures be taken on infants only when axillary use is inconvenient.
4. Very sensitive device, quick to obtain results. Reads in around 30 seconds.
5. If the thermometer is inadvertently left on after temperature stabilization, it will automatically shut off in about 3 minutes.
6. Small, light weight unit, Universal use for the whole family, especially ideal for children.
7. ABS resin body presents no hazard compared to broken mercury glass thermometers.
8. Low battery indicator: when the symbol "F" appears, the battery needs to be replaced.
9. The unit is water resistant.

Battery Replacement
1. When the symbol "F" appears, the battery needs to be replaced.
2. Unscrew the battery cover with a Phillips head screwdriver and remove it from the thermometer.
3. Use a toothpick or insulated tool to remove the battery. Avoid using any sharp metal objects.
4. Place a new battery in the chamber.
5. Reinstall and tighten the battery cover securely by screw.

How to Use
1. Hold the thermometer in the armpit and observe the temperature. The display will show the measurement temperature.
2. Depress the on/off button. The display will show "F" indicating the on/off status.
3. Release the power switch and the display will show "F" (°F) or "L" (°C) flashing.
4. Place the probe in the appropriate position (oral, axillary or rectal).
5. Once the desired temperature is reached, the thermometer will beep and the "F" symbol will disappear.
6. The unit will automatically turn off in 3 minutes (approx.). However, to prolong the battery life, it is best to turn off the thermometer once the temperature has been obtained.

Special Features:
- Normal Temperature Alert: An alarm will sound when the peak temperature has registered and the unit is ready for use. "F" (quick beep followed by a pass) will sound repeatedly for approximately 8 seconds.

RELIABLE MEASUREMENTS TO MEASURE TEMPERATURE

The reliable temperature measurements are critical to ensuring accurate readings. It is important that the thermometer be calibrated and tested regularly to ensure reliable results.

BATTERY REPLACEMENT
1. When the symbol "F" appears, the battery needs to be replaced.
2. Unscrew the battery cover with a Phillips head screwdriver and remove it from the thermometer.
3. Use a toothpick or insulated tool to remove the battery. Avoid using any sharp metal objects.
4. Place a new battery in the chamber.
5. Reinstall and tighten the battery cover securely by screw.

How to Use
1. Hold the thermometer in the armpit and observe the temperature. The display will show the measurement temperature.
2. Depress the on/off button. The display will show "F" indicating the on/off status.
3. Release the power switch and the display will show "F" (°F) or "L" (°C) flashing.
4. Place the probe in the appropriate position (oral, axillary or rectal).
5. Once the desired temperature is reached, the thermometer will beep and the "F" symbol will disappear.
6. The unit will automatically turn off in 3 minutes (approx.). However, to prolong the battery life, it is best to turn off the thermometer once the temperature has been obtained.

Special Features:
- Normal Temperature Alert: An alarm will sound when the peak temperature has registered and the unit is ready for use. "F" (quick beep followed by a pass) will sound repeatedly for approximately 8 seconds.

HOW TO USE
1. Hold the thermometer in the armpit and observe the temperature. The display will show the measurement temperature.
2. Depress the on/off button. The display will show "F" indicating the on/off status.
3. Release the power switch and the display will show "F" (°F) or "L" (°C) flashing.
4. Place the probe in the appropriate position (oral, axillary or rectal).
5. Once the desired temperature is reached, the thermometer will beep and the "F" symbol will disappear.
6. The unit will automatically turn off in 3 minutes (approx.). However, to prolong the battery life, it is best to turn off the thermometer once the temperature has been obtained.

Special Features:
- Normal Temperature Alert: An alarm will sound when the peak temperature has registered and the unit is ready for use. "F" (quick beep followed by a pass) will sound repeatedly for approximately 8 seconds.

LIMITED WARRANTY
This thermometer is guaranteed for one year from the date of purchase against manufacturer's defect under normal household use. After the warranty period, the manufacturer will, at its option, repair or replace this product without charge. This warranty does not cover damage caused by misuse, abuse, or accidents.

THERMOMETER USE
1. Place the probe in the armpit and observe the temperature. The display will show the measurement temperature.
2. Depress the on/off button. The display will show "F" indicating the on/off status.
3. Release the power switch and the display will show "F" (°F) or "L" (°C) flashing.
4. Place the probe in the appropriate position (oral, axillary or rectal).
5. Once the desired temperature is reached, the thermometer will beep and the "F" symbol will disappear.
6. The unit will automatically turn off in 3 minutes (approx.). However, to prolong the battery life, it is best to turn off the thermometer once the temperature has been obtained.

Special Features:
- Normal Temperature Alert: An alarm will sound when the peak temperature has registered and the unit is ready for use. "F" (quick beep followed by a pass) will sound repeatedly for approximately 8 seconds.

HOW TO USE
